

A2. Injections Flaws: Protection

- Use language specific libraries to perform the same functions as shell commands and system calls
- Check for existing reusable libraries to validate input, and safely perform system functions, or develop your own.
- Perform design and code reviews on the reusable libraries to ensure security.

Other common methods of protection include:

- Use stored Procedures
- Data validation (to ensure input isn't malicious code),
- Run commands with very minimal privileges
 - If the application is compromised, the damage will be minimized.
