issues often unknown to the American public policy makers researchers and even clinicians National research often combines Asian Americans into a single category not taking into account the differences and complexity among Asian ethnic subgroups The definition of Asian American derives from the U S Census Bureau s definition of Asian which includes peoples from all the vast territories of the Far East Southeast Asia and the South Asian Subcontinent While Census classifications determine demographic measurements that affect equal opportunity programs the broad rubric Asian American can never describe accurately the more than 50 distinct Asian American subgroups who together comprise multifaceted diversity across cultural ethnicities socio economic status languages religions and generations This volume rectifies that situation by exploring the unique needs and health concerns of particular subgroups within the Asian American community It consolidates a wide range of knowledge on various health issues impacting Asian Americans while also providing a discussion into the cultural social and structural forces impacting morbidity mortality and quality of life The volume is designed to advance the understanding of Asian American health by explaining key challenges and identifying emerging trends faced in specific ethnic groups and diseases illnesses innovative community based interventions and the future needed areas of research

Challenging Academia Heather Piper, Else-Marie Buch Leander, 2021-09-01 Some social issues and practices have become dangerous areas for

academics to research and write about Academic freedom is increasingly constrained not just by long established normal factors territoriality power differentials competition protectionism but also by the increased significance of social media and the rise of identity politics and activists who treat work which challenges their world view as abusive hate speech So extreme are these pressures that some institutions and even statutory bodies now adopt policies and practices which contravene relevant regulations and laws This book seeks to draw attention to the limiting and damaging effects of academic gagging The book drawn from a special edition of Societies offers an eclectic series of international articles which may annoy some people The book challenges taken for granted mainstream assumptions and practices in a number of areas including gender mainstreaming social work education child sexual abuse the ethnic disaggregation of population groups fatherhood and masculinity the erosion of democratic legitimacy the trap of victimhood and vulnerability employment practices in universities and the challenges presented by the widespread and deliberate suppression of scholarship and research In an analytic postscript Laurent Dubreuil discusses the nature of identity politics and the manner in which its effects can be identified across the many topics covered in these challenging articles
