Asian Space Race Rhetoric Or Reality:

Asian Space Race: Rhetoric or Reality? Ajey Lele, 2012-10-20 This book explores the character and contours of the Asian Space Powers At present Asian states like China Japan and India are found investing in space technologies with analogous social and scientific and probably with divergent military intents Other Asian states like Israel South Korea and Malaysia are also making investments in the space arena States like Iran and North Korea are faulted for using space launches as a demonstrative tool to achieve strategic objectives This work examines this entire maze of activities to unearth where these states are making these investments to accomplish their state specific goal or are they also trying to surpass each other by engaging in competition Explaining why and how these states are making investments towards achieving their socio economic and strategic mandate this book infers that the possibility of Asian Space Race exists but is presently fairly diminutive

Sabre Rattling in Space Ahmad Khan, Eligar Sadeh, 2024-12-13 This book offers historical and theoretical context of the path followed by States from space militarization to weaponization and deconstructs traditional security paradigm myths to prove that a paradigm shift has been brought because of deadly space weapons developed by major space powers It reconciles that the strategic distrust between two leading space competitors U S and China has prompted them to pursue counter space capabilities The ripple effect of this troubling relation in space is not limited at the global level but has witnessed a trickledown effect on regional security In relation to this the book offers details of the Indian space program including its military space ambitions and provides information about Pakistan s objectives in space It offers an overview of challenges to international space governance and how the structural flaws help states to aggressively follow a path toward space weaponization Additionally it discusses the UN negotiating arms control measures in space and the politics of states not to negotiate prevention of an arms race in outer space The book is a useful contribution to space security from both traditional and contemporary approaches covering history theory and application It provides an academic as well as practical approach carrying appeal for professionals experts opinion makers industry academics teachers policy makers politicians and masses from other walks of life who are interests in space security

India in Space: Between Utility and Geopolitics Marco Aliberti, 2018-01-17 This book presents the renewing strategic vision and progressive diversification of the Indian space programme at the nexus socio economic development commerce and geopolitics It disentangles India s evolving rationales for engaging in space from a wide range of perspectives and provides novel and in depth assessment of the domestic regional and international factors influencing the pace and directions of the country s space programme The study hence includes an extensive analysis of India s path forward including a reflection on the long term evolution of its civil military and commercial space efforts as well as considerations on the toolbox India has at its disposal on the prospected adaptation of the space ecosystem and on the implications these evolutions may generate both domestically and internationally A central part of this final analysis is more specifically devoted to elaborating on the prospects and

opportunities for European stakeholders with the goal of identifying possible domains of closer and mutually beneficial Europe India space cooperation and sorting out possible elements for a comprehensive European long term strategy towards India

Japan In Space Brian Harvey, 2023-11-16 Guided by genius engineer Hideo Itokawa Japan's space program began with small scientific satellites more than 50 years ago Since then its space probes have travelled to the Moon Venus the asteroids and even a comet The country launched weather satellites to warn of typhoons communications satellites to connect the Japanese archipelago and remote sensing technology to observe the Earth and warn of climate change Engineering technology satellites became the basis of Japan's electronic industry as Japanese astronauts flew into space working on their Kibo module on the International Space Station Now Japan is one of Asia's leading space powers alongside China and India vying for influence in the region Its solid and liquid fueled rockets are estimated to be among the most advanced and reliable in the world its technology among the best This book examines the history of Japan's space program the country's current state of development and its future It describes the extensive infrastructure that has gone into the forging of Japan's picturesque oceanside launch sites training centers testing facilities and tracking stations This book also outlines the politics of space in Japan financial difficulties its space industry the symbiotic relationship with the United States and the recent sharp change of course to invest in military satellites From the role of influential personalities such as Hideo Shima and Shinichi Nakasuka to political leaders such as Yasuhiro Nakasone and Takeo Kawamura you will read about how Japan has paved its own star lit path to space The future may expect to send Japanese probes to Mercury and the moons of Mars all while the first Japanese astronauts set foot on our own Moon and drive innovative rovers across its surface

Above and Beyond Louis Brennan, Loizos Heracleous, Alessandra Vecchi, 2018-05-15 The global space sector has always been regarded as a cutting edge field futuristic and at the forefront of innovation In recent years the sector has undergone massive change giving rise to a high technology niche worth over 330 billion in revenues worldwide and growing That process encompassing a greater and more diverse set of actors has been described as the democratization of space Above and Beyond Exploring the Business of Space provides a comprehensive and current overview of the business of space and its distinctive competitive dynamics The book explores the commercialization of space taking the reader on a journey from the era of the Space Race up to the present and beyond Focusing on both state and commercial actors the book provides an exhaustive panoramic view of an area of growing human endeavour and ambition that is both informative and fascinating As the business of space continues to develop and grow at a remarkable pace the book offers a thoughtful and timely analysis of its past present and future scenarios While providing a critical assessment of the business of space this book offers valuable insights to academics policy makers and anyone with a keen interest in the sector as well as useful lessons from emerging commercial and traditional space actors that have broader applicability to other industries and their managers

China under Xi Jinping, 2024-11-07 China under Xi Jinping an Interdisciplinary Assessment offers an overview of reforms and

changes that took place in China under Xi Jinping's administration in years 2012-2022. The book focuses on the impact of Xi's rule on China's political system with special attention given to the features that distinguish Xi from his predecessors. The authors discuss among others the Xi Jinping Thought and the nature of his leadership factors contributing to China's economic success, the future of the Belt and Road Initiative, China's response to challenges in terms of security, climate policy, energy transition, pandemics, as well as its ambition to become a global superpower in domains such as space exploration and sports. The volume also analyzes the influence that Xi Jinping's government has exerted on the Chinese state, society and culture, concentrating on areas such as healthcare, education, politics regarding religion, the evolution of Chinese nationalism, the developments in Chinese cinema, music, language and even political humor. To understand what characterizes Xi as a politician and how his time in office is reflected in today's China, experts on China-related matters appear in five parts or dimensions including political, economic, social, cultural and foreign policy issues. This publication will spark the readers' interest in and increase their awareness concerning the developments in the People's Republic of China under Xi Jinping.

Space Science and the Arab World Jörg Matthias Determann, 2018-01-29. When Sultan bin Salman left Earth on the shuttle Discovery in 1985, he became the first Arab, first Muslim and first member of a royal family in space. Twenty-five years later, the discovery of a planet 500 light years away by the Qatar Exoplanet Survey, subsequently named Qatar 1b, was evidence of the cutting-edge space science projects taking place across the Middle East. This book identifies the individuals, institutions and national ideologies that enabled Arab astronomers and researchers to gain support for space exploration when Middle East governments lacked interest. Jörg Matthias Determann shows that the conquest of space became associated with national prestige, security, economic growth and the idea of an Arab renaissance more generally. Equally important to this success were international collaborations to benefit from American and Soviet expertise and technology. Arab scientists and officials had to commit to global governance of space and the common interests of humanity. Challenging the view that the golden age of Arabic science and cosmopolitanism was situated in the medieval period, Determann tells the story of the new discoveries and scientific collaborations taking place from the 19th century to the present day. An innovative contribution to Middle East studies and history of science, the book also appeals to increased business, media and political interest in the Arab space industry.

Yearbook on Space Policy 2012/2013 Cenani Al-Ekabi, Blandina Baranes, Peter Hulsroij, Arne Lahcen, 2015-02-06. The Yearbook on Space Policy is the reference publication analyzing space policy developments. Each year it presents issues and trends in space policy and the space sector as a whole. Its scope is global and its perspective is European. The Yearbook also links space policy with other policy areas. It highlights specific events and issues and provides useful insights, data and information on space activities. The Yearbook on Space Policy is edited by the European Space Policy Institute (ESPI) based in Vienna, Austria. It combines in-house research and contributions of members of the European Space Policy Research and Academic Network (ESPRAN) coordinated by ESPI. The Yearbook is designed for

government decision makers and agencies industry professionals as well as the service sectors researchers and scientists and the interested public

Geopolitics of the Outer Space Bohumil Doboš, 2018-09-25 This book presents a comprehensive geopolitical analysis of European space activities By studying outer space as a physical and socio economic space as well as a military diplomatic area the author helps readers understand outer space as a geopolitical environment The book also offers insights into the behavior and strategies of different actors with a special focus on the European space strategy and the nature of the European space program and diplomacy

The Geopolitics of Space Colonization Bohumil Doboš, 2023-09-21 This book presents a geopolitical analysis of the upcoming human exploration of celestial bodies in the inner solar system by the major space powers It utilizes a systemic approach to the analysis of political events in space to develop a comprehensive overview of the factors influencing planned or proposed missions to the selected objects the Moon Mars and asteroids As a result of this analysis the book establishes forward looking scenarios of possible developments to highlight the main fault lines of the upcoming operations beyond the currently most heavily utilized terrestrial orbits This framework is rooted in a holistic overview of factors relevant to the mid term settlement and mining efforts and allows us to highlight the main focal points that will determine the future power distribution inside the inner solar system The methodology is based on the analysis of an interplay of numerous factors deemed crucial for the decision making of the major space powers and their capacities to promote their interests in a given region Major space powers are for the purpose of this book understood as those actors with a realistic ability to participate in or lead the inner solar system colonization and mining missions in the mid term future for which scenario making is the most suitable Given the realities of space travel however smaller actors are also taken into consideration as a part of cooperative efforts which are nonetheless dominated by the major players or alternatively as possible spoilers of the efforts in several regional settings The book thus provides an in depth analysis of the possible futures regarding the nearing competition over the celestial bodies This book will be of much interest to students of space power and policy geopolitics airpower and International Relations
