GE Lunar Achilles Insight Densitometer Machine

The GE Lunar Achilles Insight is GE's first bone ultrasound system that provides instant imaging of the patient's heel that can be used to assess osteoporosis. When you use the Achilles Insight, you will be able to view the bone measurement location prior to conducting the measurement so other systems have relied on using a "blind measurement". This machine displays a live image right before the measurement to assure that you are measuring the correct region.

The GE Lunar Achilles Insight measures the bone quality of the patient's heel by using sound waves. The results that are produced are used to indicate any risk of osteoporosis as well as aid in diagnosis and monitor any therapy needed. When you buy the GE Lunar Achilles Insight, you now have a reliable alternative to DXA, but provides you with immediate results.
