Figuring out Figuration María Sandra Peña-Cervel,Francisco José Ruiz de Mendoza Ibáñez,2022-05-15 This book combines explanatory breadth with analytical delicacy It offers a comprehensive study of a broad array of traditional figures of speech by systematizing linguistic evidence of the cognitive processes underlying them Such processes are explicitly linked to different communicative consequences thus bringing together pragmatics and cognition This type of study has allowed the authors to provide new definitions for all the figures while making their dependency relations fully explicit For example hypallage antonomasia anthimeria and merism are studied as variants of metonymy and analogy paragon and allegory as variants of metaphor An important feature of the book is its special emphasis on the combinations of figures of speech into conceptually more complex configurations Finally the book accounts for the principles that regulate the felicity of figurative expressions The result is a broad integrative framework for the analysis of figurative language grounded in the relationship between pragmatics and cognition

Metaphor and Thought Andrew Ortony,1993-11-26 Metaphor and Thought first published in 1979 reflects the surge of interest in and research into the nature and function of metaphor in language and thought In this revised and expanded second edition the editor has invited the contributors to update their original essays to reflect any changes in their thinking Reorganised to accommodate the shifts in central theoretical issues the volume also includes six new chapters that present important and influential fresh ideas about metaphor that have appeared in such fields as the philosophy of language and the philosophy of science linguistics cognitive and clinical psychology education and artificial intelligence

Studies in Figurative Thought and Language Angeliki Athanasiadou,2017-04-26 This volume contains original research and innovative analyses that deepen our understanding of figurative thought and language The selected papers focus on the multi faceted aspect of figuration its function in thought and its impact on areas of grammar and communication Key topics explored include metaphor metonymy and their relationship to each other as well as the less studied figure of hyperbole and its relation to the fundamental figures of metaphor and metonymy Collectively the papers examine the pragmatic reasoning processes triggered by figurative thought the lexicogrammatical motivations and or constraints on figurative language the impact of deeply entrenched figurative thought on the lexicon of natural languages the cultural origins of figurative thought and the psycholinguistic motivations for figuration The comprehensive treatment of these issues is fundamental for future research on figurative thought and language particularly on questions of universality vs specificity of figuration the impact of figuration on constructions cross linguistic comparisons of figurative language and cognitive pragmatic approaches to figurative meaning

Social and Cognitive Approaches to Interpersonal Communication Susan R. Fussell,Roger J. Kreuz,2014-02-25 Historically the social aspects of language use have been considered the domain of social psychology while the underlying psycholinguistic mechanisms have been the purview of cognitive psychology Recently it has become increasingly clear that these two dimensions are highly interrelated cognitive mechanisms underlying speech production and comprehension interact with social psychological factors such as beliefs about one s interlocutors and politeness norms and with the dynamics of the conversation itself to produce shared meaning This realization has led to an exciting body of research integrating the social and cognitive dimensions which has greatly increased our understanding of human language use Each chapter in this volume demonstrates how the theoretical approaches and research methods of social and cognitive psychology can be successfully interwoven to provide insight into one or more fundamental questions about the process of interpersonal communication The topics under investigation include the nature and role of speaker intentions in the communicative process the production and comprehension of indirect speech and figurative language perspective taking and conversational collaboration and the relationships between language cognition culture and social

interaction The book will be of interest to all those who study interpersonal language use social and cognitive psychologists theoretical and applied linguists and communication researchers

Poetry is dead Poetry is all around us Both are trite truisms that this book exploits and challenges In his 1798 Advertisement to *Lyrical Ballads* William Wordsworth anticipates that readers accustomed to the poetic norms of the day might not recognize his experiments as poems and might signal their awkward confusion upon opening the book by looking round for poetry as if seeking it elsewhere *Look Round for Poetry* transforms Wordsworth's idiomatic expression into a methodological charge By placing tropes and figures common to Romantic and Post Romantic poems in conjunction with contemporary economic technological and political discourse *Look Round for Poetry* identifies poetry's untimely echoes in discourses not always read as poetry or not always read poetically Once one begins looking round for poetry McGrath insists one might discover it in some surprising contexts In chapters that spring from poems by Wordsworth Lucille Clifton John Keats and Percy Bysshe Shelley McGrath reads poetic examples of understatement alongside market demands for more the downturned brow as a figure for economic catastrophe Romantic cloud metaphors alongside the rhetoric of cloud computing the election of the dead as a poetical and not just a political act and poetic investigations into the power of prepositions as theories of political assembly For poetry to retain a vital power McGrath argues we need to become ignorant of what we think we mean by it In the process we may discover critical vocabularies that engage the complexity of social life all around us
