Cloud Computing in Libraries Mayank Yuvaraj,2020-10-12 Cloud computing is a model where computing resources processors storage software are offered as a utility from an indistinct location and boundaries to the user Adoption of Cloud computing in recent years has gained momentum within various avenues round the globe due to its characteristics like elasticity virtualization and pay as you go pricing In tune with the trend various companies have evolved which are offering web applications These companies provide the system required to host the application to users on lease which saves them from purchasing The book combines both theoretical and practical perspectives of cloud computing with a slant towards library and information centres The book describes in detail about various companies which are providing cloud computing solutions and infrastructure for library and information centres Initiatives of OCLC and best practices adopted in other libraries around the world has been discussed at length Many avenues of the implementation of cloud

computing has been identified in the present study Various initiatives of the library professionals to move their internet sites their integrated library system for cataloguing and acquisition Cloud based library apps Cloud based Stack Map and their repository systems and inter library loan systems to the cloud has been mentioned The book further proposes a model which may serve as a blueprint for implementation of cloud computing technologies in libraries With the timely publication of book library and information service practitioners after going through the book can outsource the task of maintaining the computer infrastructure and focus on their mission to serve people with right information at right point of time

Introduction to Email Gilad James, PhD, Email is a widely available and modern means of communication that has replaced the traditional system of posting letters It is a fast and efficient method of communicating with anyone regardless of their location or time zone One of the major advantages of email is that it enables users to attach files and documents making it easy to share information with others Additionally emails can be saved as drafts allowing users to revisit them later before sending or deleting them Email also creates a paper trail making it easy to track communication between different parties which is particularly useful in business environments where evidence might be required in case of legal disputes Despite its many advantages email has some limitations For instance it can be difficult to read emotions in emails leading to misunderstandings or misinterpretations of messages Moreover it is not very effective in situations that require immediate responses or when the sender is not sure if the recipient is actively checking their email Finally emails are vulnerable to hacking and phishing attacks which can result in unauthorized access to a user s account or loss of sensitive information Therefore users must be cautious when sending and receiving emails to ensure their accounts and information are secured
