Structured approach to paediatric emergencies

Figure 1.4 Structured approach to paediatric emergencies

A structured approach to paediatric emergencies will enable children to manage emergencies in a logical and effective fashion and assist in ensuring that all steps are not forgotten even in unfamiliar or infrequent emergency situations (Figure 1.4). The steps are:

- Identification of life-threatening situations (based on observed signs), absent or ineffective breathing, or absent pulse or shock requiring immediate interventions which comprise resuscitation
- Following resuscitation, looking for key features which support likely working diagnosis
- Initiation of emergency treatment
- Reassessment and transfer to definitive care
