Apoptosis The Life And Death Of Cells Developmental Cell Biology:

Apoptosis Christopher Potten, James Wilson, 2004-08-16 This book describes the biological implications and significance of apoptosis Occurring naturally throughout the lifetime of most multicellular organisms apoptosis or programmed cell death accounts for the continuous turnover of cells in the body However the genes regulating apoptosis are defective in many cancers

The Oncogenomics Handbook William J. LaRochelle, Richard A. Shimkets, 2007-11-09 An integrated overview of cancer drug discovery and development from the bench to the clinic showing with broad strokes and representative examples the drug development process as a network of linked components leading from the discovered target to the ultimate therapeutic product Following a systems biology approach the authors explain genomic databases and how to discover oncological targets from them how then to advance from the gene and transcript to the level of protein biochemistry how next to move from the chemical realm to that of the living cell and ultimately pursue animal modeling and clinical development Emerging cancer therapeutics including Rituxan Erbitux Gleevec Herceptin Avastin ABX EGF Velcade Kepivance Iressa Tarceva and Zevalin are addressed Highlights include cancer genomics pharmacogenomics transcriptomics gene expression analysis proteomic and enzymatic cancer profiling technologies and cellular and animal approaches to cancer target validation
