Applied Data Analysis And Modeling For Energy Engineers And Scientists:

Applied Data Analysis and Modeling for Energy Engineers and Scientists T. Agami Reddy, 2011-08-09 Applied Data Analysis and Modeling for Energy Engineers and Scientists fills an identified gap in engineering and science education and practice for both students and practitioners It demonstrates how to apply concepts and methods learned in disparate courses such as mathematical modeling probability statistics experimental design regression model building optimization risk analysis and decision making to actual engineering processes and systems The text provides a formal structure that offers a basic broad and unified perspective while imparting the knowledge skills and confidence to work in data analysis and modeling This volume uses numerous solved examples published case studies from the author s own research and well conceived problems in order to enhance comprehension levels among readers and their understanding of the processes along with the tools

Applied Data Analysis and Modeling for Energy Engineers and Scientists T. Agami Reddy, Gregor P. Henze, 2023-10-18 Now in a thoroughly revised and expanded second edition this classroom tested text demonstrates and illustrates how to apply concepts and methods learned in disparate courses such as mathematical modeling probability statistics experimental design regression optimization parameter estimation inverse modeling risk analysis decision making and sustainability assessment methods to energy processes and systems It provides a formal structure that offers a broad and integrative perspective to enhance knowledge skills and confidence to work in applied data analysis and modeling problems This new edition also reflects recent trends and advances in statistical modeling as applied to energy and building processes and systems It includes numerous examples from recently published technical papers to nurture and stimulate a more research focused mindset How the traditional stochastic data modeling methods complement data analytic algorithmic approaches such as machine learning and data mining is also discussed The important societal issue related to the sustainability of energy systems is presented and a formal structure is proposed meant to classify the various assessment methods found in the literature Applied Data Analysis and Modeling for Energy Engineers and Scientists is designed for senior level undergraduate and graduate instruction in energy engineering and mathematical modeling for continuing education professional courses and as a self study reference book for working professionals In order for readers to have exposure and proficiency with performing hands on analysis the open source Python and R programming languages have been adopted in the form of Jupyter notebooks and R markdown files and numerous data sets and sample computer code reflective of real world problems are available online

Expanding Boundaries: Systems Thinking in the Built Environment Guillaume Habert, Arno Schlueter, 2016-08-15 Consuming over 40% of total primary energy the built environment is in the centre of worldwide strategies and measures towards a more sustainable future To provide resilient solutions a simple optimisation of individual technologies will not be sufficient In contrast whole system thinking reveals and exploits connections between parts Each system interacts with others on different scales materials components buildings cities and

domains ecology economy and social Whole system designers optimize the performance of such systems by understanding interconnections and identifying synergies The more complete the design integration the better the result In this book the reader will find the proceedings of the 2016 Sustainable Built Environment SBE Regional Conference in Zurich Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment **Smart Cities** Houbing Song,Ravi Srinivasan,Tamim Sookoor,Sabina Jeschke,2017-06-21
