Strategic Security Jean Perois, 2019-05-08 Strategic Security will help security managers and those aspiring to the position to think strategically about their job the culture of their workplace and the nature of security planning and implementation Security professionals tend to focus on the immediate the urgent rather than the important and essential too often serving as firefighters rather than strategists This book will help professionals consider their roles and structure their tasks through a strategic approach without neglecting their career objectives Few security management books for professionals in the field focus on corporate or industrial security from a strategic perspective Books on the market normally provide recipes methods or guidelines to develop plans policies or procedures However many do so without taking into account the personal element that is supposed to apply these methods In this book the authors helps readers to consider their own career development in parallel with establishing their organisation security programme This is fundamental to becoming and serving as a quality effective manager The element of considering career objectives as part and parcel to this is both unique to only this book and vital for long term career success The author delineates what makes strategic thinking different in a corporate and security environment While strategy is crucial in the running of a company the traditional attitude towards security is that it has to fix issues quickly and at low cost This is an attitude that no other department would tolerate but because of its image security departments sometimes have major issues with buy in and from top management The book covers the necessary level of strategic thinking to put their ideas into practice Once this is achieved the strategic process is explained including the need to build the different steps into this process and into the overarching business goals of the organisation will be demonstrated The book provides numerous hand on examples of how to formulate and execute the
