depth analyses of space ethics and approaches to governance on territories beyond Earth With insights from a vast background of academic subjects including science law philosophy psychology and politics it presents a holistic take on the expression of space freedoms and what it might mean for humankind **Shadows of the Future** Patrick

Parrinder, 1995-09-01 H G Wells the inventor of the concept of the time machine and the phrase the Shape of Things to Come

described his life's work as one of critical anticipation. *Shadows of the Future* identifies the attempt to imagine possible futures as the unifying principle behind Wells's diverse and sometimes wayward literary career. The book unravels the complex layers of meaning in *The Time Machine* and shows how throughout his life he sought to exploit the potential of literary and cultural prophecy in new ways. Described by John Middleton Murry as the last prophet of bourgeois Europe, he was also its first futurologist. In *Shadows of the Future*, Wells's assumption of the prophet's role is related to his championship of the modern scientific outlook and to the theory and practice of science fiction and utopian literature. Parrinder explores the connections between novelty and repetition between imagining the future and imagining the past and between prophecy and parody as literary modes. Wells's science fiction is reexamined both as a projection of the cosmology implicit in the writings of Darwin and Huxley and as a new variation on the Romantic and Enlightenment themes of such earlier authors as Blake, Gibbon, and Mary Shelley. Later chapters relate Wells's fiction to his nonfiction and look at the uneasy relationship of his utopianism to literary prophecy and at the paradoxes inherent in the militant internationalism of the prophet at large. Finally, Wells's influence is traced in a study of the antiutopian fictions of Zamyatin and Orwell and in a broad account of the connections between science fiction and the scientific outlook down to our own time. *Foods of the Gods* Gary

Westfahl, George Edgar Slusser, Eric S. Rabkin, 1996. Gluttony and starvation, pleasure and pain, growth and decay. These and other extremes of our condition related to food, though all but banned from the civilized tables of mainstream fiction, are ideal topics for the undomesticated, free-roaming modes of fantasy. As acts and ideas, food and eating are fundamental to all that makes us human and dominate our symbolic realms of art, literature, and cuisine. These essays show us the power of speculative modes of fiction to help us look anew at prehistorical and psychomythical attitudes toward food and eating, historical Western cultural attitudes toward the material fact of food and the necessity of eating, and the relationship between attitudes toward food and how, how much, when, and where we eat. The contributors come from a variety of backgrounds, including anthropology, film, and French, Russian, English, and medieval literature. Ranging in their focus from shamans to cannibals, utopias to social Darwinism, muscle magazines to supermarket tabloids, the contributors discuss the theory and practice of science-fictional eating, the dialectic at the level of eating between individual needs and collective norms, and the ways that eating habits and the availability and choice of food serve to contextualize and demarcate modern fictional genres. In addition to discussing such writers as C. S. Lewis, Stephen King, Octavia Butler, Jonathan Swift, and Anne Rice, the contributors also consider such films as *Indiana Jones and the Temple of Doom* and Cocteau's *Beauty and the Beast*.

Socialist Cosmopolitanism Nicolai Volland, 2017-03-28. *Socialist Cosmopolitanism* offers an innovative interpretation of literary works from the Mao era that reads Chinese socialist literature as world literature. As Nicolai Volland demonstrates, after 1949 China engaged with the world beyond its borders in a variety of ways and on many levels: politically, economically, and culturally. Far from rejecting the worldliness of earlier eras, the young People's Republic developed its own

cosmopolitanism Rather than a radical break with the past Chinese socialist literature should be seen as an integral and important chapter in China's long search to find a place within world literature Socialist Cosmopolitanism revisits a range of genres from poetry and land reform novels to science fiction and children's literature and shows how Chinese writers and readers alike saw their own literary production as part of a much larger literary universe This literary space reaching from Beijing to Berlin from Prague to Pyongyang from Warsaw to Moscow to Hanoi allowed authors and texts to travel reinventing the meaning of world literature Chinese socialist literature was not driven solely by politics but by an ambitious but ultimately doomed attempt to redraw the literary world map
