Clough, 2013-08-01 This book examines one of the most pressing cultural concerns that surfaced in the last decade the question of the place and significance of the animal This collection of essays represents the outcome of various conversations regarding animal studies and shows multidisciplinary at its very best namely a rigorous approach within one discipline in conversation with others around a common theme The contributors discuss the most relevant disciplines regarding this conversation namely philosophy anthropology religious studies theology history of religions archaeology and cultural studies The first section Thinking about Animals explores philosophical anthropological and religious perspectives raising general questions about the human perception of animals and its crucial cultural significance The second section explores the intriguing topic of the way animals have been used historically as religious symbols and in religious rituals The third section re examines some Christian theological and biblical approaches to animals in the light of current concerns The final section extends the implications of traditional views about other animals to more specific ethical theories and practices

Conversations on Human Nature Agustín Fuentes, Aku Visala, 2016-07 Based on interviews with twenty leading scholars Conversations on Human Nature probes the question of what it means to be human from evolutionary biological philosophical cultural and theological points of view

Beastly Morality Jonathan K. Crane, 2015-12-01 We have come to regard nonhuman animals as beings of concern and we even grant them some legal protections But until we understand animals as moral agents in and of themselves they will be nothing more than distant recipients of our largesse Featuring original essays by philosophers ethicists religionists and ethologists including Marc Bekoff Frans de Waal and Elisabetta Palagi this collection demonstrates the ability of animals to operate morally process ideas of good and bad and think seriously about sociality and virtue Envisioning nonhuman animals as distinct moral agents marks a paradigm shift in animal studies as well as philosophy itself Drawing not only on ethics and religion but also on law sociology and cognitive science the essays in this collection test long held certainties about moral boundaries and behaviors and prove that nonhuman animals possess complex reasoning capacities sophisticated empathic sociality and dynamic and enduring self conceptions Rather than claim animal morality is the same as human morality this book builds an appreciation of the variety and character of animal sensitivities and perceptions across multiple disciplines moving animal welfarism in promising new directions

Inside Animal Hearts and Minds Belinda Recio, 2017-08-01 As Charles Darwin suggested more than a century ago the differences between animals and humans are of degree and not of kind Not long ago ethologists denied that animals had emotions or true intelligence Now we know that rats laugh when tickled magpies mourn as they cover the departed with greenery female whales travel thousands of miles for annual reunions with their gal pals seals navigate by the stars bears hum when happy and crows slide down snowy rooftops for fun In engaging text photographs and infographics Inside Animal Hearts and Minds showcases fascinating

and heart warming examples of animal emotion and cognition that will foster wonder and empathy Learn about an orangutan who does macram monkeys that understand the concept of money and rats that choose friendship over food Even language math and logic are no longer exclusive to humans Prairie dogs have their own complex vocabularies to describe human intruders parrots name their chicks sea lions appear capable of deductive thinking akin to a ten year old child s and bears lemurs parrots and other animals demonstrate numerical cognition In a world where a growing body of scientific research is closing the gap between the human and non human Inside Animal Hearts and Minds invites us to change the way we view animals the world and our place in it *On Animals* David L. Clough,2018-12-27 This book presents an authoritative and comprehensive survey of human practice in relation to other animals together with a Christian ethical analysis building on the theological account of animals which David Clough developed in *On Animals* Volume I Systematic Theology 2012 It argues that a Christian understanding of other animals has radical implications for their treatment by humans with the human use and abuse of non human animals for food the most urgent immediate priority Following an introduction examining the task of theological ethics in relation to non human animals and the way it relates to other accounts of animal ethics this book surveys and assess the use humans make of other animals for food for clothing for labour as research subjects for sport and entertainment as pets or companions and human impacts on wild animals The result is both a state of the art account of what humans are doing to other animals and a persuasive argument that Christians in particular have strong faith based reasons to acknowledge the significance of the issues raised and change their practice in response
