Agents and Data Mining Interaction Longbing Cao, A.E. Gorodetsky, Jiming Liu, Gerhard Weiß, Philip S. Yu, 2009-07-30
The 2009 International Workshop on Agents and Data Mining Interaction ADMI 2009 was a joint event with AAMAS 2009. In recent years, agents and data mining interaction ADMI or agent mining for short has emerged as a very promising research field. Following the success of ADMI 2006 in Hong Kong, ADMI 2007 in San Jose and ADMI 2008 in Sydney, the ADMI 2009 workshop in Budapest provided a premier forum for sharing research and engineering results as well as potential challenges and prospects encountered in the synergy between agents and data mining. As usual, the ADMI workshop encouraged and promoted theoretical and applied research and development which aims at exploiting agent driven data mining and demonstrating how intelligent agent technology can contribute to critical data mining problems in theory and practice. Improving data mining driven agents and showing how data mining can strengthen agent intelligence in research and practical applications. Exploring the integration of agents and data mining toward a super intelligent information processing and systems. Identifying challenges and directions for future research on the synergy between agents and data mining. ADMI 2009 featured two invited talks and twelve selected papers. The first invited talk was on Agents and Data Mining in Bioinformatics with the second focusing on Knowledge Based Reinforcement Learning. The ten accepted papers are from seven countries. A majority of submissions came from European countries, indicating the boom of ADMI research in Europe. In addition, the two invited papers addressed fundamental issues related to agent driven data mining, data mining driven agents, and agent mining applications. The proceedings of the ADMI workshops will be published as part of the LNAI series by Springer. We appreciate the support of Springer and in particular Alfred Hofmann. *Agents and Data Mining Interaction* Longbing Cao, Ana L.C. Bazzan, Vladimir Gorodetsky, Pericles A. This book constitutes the thoroughly refereed post-workshop proceedings of the 7th International Workshop on Agents and Data Mining Interaction ADMI 2011 held in Taipei, Taiwan, in May 2011, in conjunction with AAMAS 2011, the 10th International Joint Conference on Autonomous Agents and Multiagent Systems. The 11 revised full papers presented were carefully reviewed and selected from 24 submissions. The papers are organized in topical sections on agents for data mining, data mining for agents, and agent mining applications. **Data Mining and Multi-agent Integration** Longbing Cao, 2009-07-25
Data Mining and Multi-agent Integration aims to reflect state-of-the-art research and development of agent mining interaction and integration for short.

agent mining The book was motivated by increasing interest and work in the agents data mining and vice versa The interaction and integration comes about from the intrinsic challenges faced by agent technology and data mining respectively for instance multi agent systems face the problem of enhancing agent learning capability and avoiding the uncertainty of self organization and intelligence emergence Data mining if integrated into agent systems can greatly enhance the learning skills of agents and assist agents with predication of future states thus initiating follow up action or intervention The data mining community is now struggling with mining distributed interactive and heterogeneous data sources Agents can be used to manage such data sources for data access monitoring integration and pattern merging from the infrastructure gateway message passing and pattern delivery perspectives These two examples illustrate the potential of agent mining in handling challenges in respective communities There is an excellent opportunity to create innovative dual agent mining interaction and integration technology tools and systems which will deliver results in one new technology *Domain Driven Data Mining*
