The latest exciting title in DK's popular *Where on Earth* series maps out the habitats of the world's mammals, fish, birds, reptiles, invertebrates and more. Whether it's plotting the range of a lion, following the flight paths of birds, tracking great white sharks in the oceans or exploring the migration of the monarch butterfly, you will see exactly where and how more than 100 extraordinary animal species live. What makes *Where on Earth* Animals unique are the maps themselves. Each one is individually commissioned in 3D with detail to show the habitat of each animal as well as its geographic location. This reveals an astonishing amount of information about the behavior of these animals, from how seals are adapted to survive in freezing Antarctic seas to how beetles survive in the heat of the Sahara desert. There is also a focus on the conservation and protection of animals. Maps reveal the shrinking territories

of some species showing where they used to roam in the past compared to what's left of their range today.
