Bionomia del paesaggio

L'ecologia del paesaggio biologico-integrata
per la formazione di un "medico" dei sistemi ecologici

 Springer

Bionomia Del Paesaggio

AA. VV.

Bionomia Del Paesaggio:

Bionomia del paesaggio Vittorio Ingegnoli, 2011-07-14 L'ecologia del paesaggio biologico integrata o meglio Bionomia del Paesaggio si propone come un atto di rifondazione della disciplina iniziato dall'Autore una dozzina di anni fa con l'appoggio di Richard Forman basato sul riconoscimento del paesaggio come specifico livello dell'organizzazione della vita sulla Terra. A scala territoriale in un determinato ambito geografico il paesaggio si definisce come integrazione di un insieme di comunità vegetali, animali ed umane e del loro sistema di ecosistemi naturali, seminaturali e antropico-culturali in una certa configurazione spaziale, cioè come sistema iper-complesso che costituisce una entità vivente, non un insieme incoerente, quindi di aspetti e di tematiche separate: acqua, aria, suolo, specie, inquinamenti, tra cui si possano trovare delle interrelazioni. Ci porta inevitabilmente notevoli cambiamenti nelle modalità di valutare e gestire l'ambiente. Possiamo infatti riconoscere delle strutture e delle funzioni proprie di ogni paesaggio, ossia dei comportamenti peculiari che vanno oltre le classiche relazioni fra le componenti, perché dovuti a leggi sistemiche. Si può così parlare di uno stato di salute e di una serie di sindromi o patologie del paesaggio. Questo fatto è assai rilevante perché si è dimostrato che le alterazioni patologiche di un paesaggio o di una sua parte possono influire sulla salute umana anche in assenza di inquinamenti. Prestiamo attenzione al fatto che si può intervenire sul territorio con le migliori intenzioni causando invece un danno. Ne consegue la necessità di studiare le unità di paesaggio con un metodo clinico diagnostico e di considerare gli ecologi come medici dei sistemi ecologici, cioè ecoiatri.

Urban Services to Ecosystems Chiara Catalano, Maria Beatrice Andreucci, Riccardo Guarino, Francesca Bretzel, Manfredi Leone, Salvatore Pasta, 2021-09-15 The aim of this book is to bring together multidisciplinary research in the field of green infrastructure design, construction and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature-based solutions and sustainable urban development. The green infrastructure and its ecosystem services indeed are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man-made environment like cities from heterotrophic to autotrophic ecosystems. From landscape ecology to urban and building design like bricks of a wall from the small scale to the bigger landscape scale via ecological networks and corridors, we should start answering these questions: what are the services that we are offering to Nature? What are we improving? How to implement our actions? This book contains three Open Access chapters which are licensed under the terms of the Creative Commons Attribution 4.0

International License CC BY 4.0 **Environmental Alteration Leads to Human Disease** Vittorio Ingegnoli, Francesco Lombardo, Giuseppe La Torre, 2022-03-03 This book aims to explore the impact of human alterations of Earth's ecological systems on human health. Human activities are producing fundamental biophysical changes faster than ever before in the history of our species, which are accompanied by dangerous health effects. Drawing on advanced ecological principles, the

book demonstrates the importance of using systemic medicine to study the effects of ecological alterations on human health. Planetary Health is an interdisciplinary field but first of all it must be systemic and it needs a preferential relationship between Ecology and Medicine. This relation is to be upgrading because today both ecology and medicine pursue few systemic characters and few correct interrelations. We need to refer to new principles and methods sustained by the most advanced fields as Landscape Bionomics and Systemic Medicine. Thus we will be able to better discover environmental syndromes and their consequences on human health. Environmental transformations proposed by PHA from biodiversity shifts to climate change do not consider bionomic dysfunctions which can menace human health. On the contrary, finding advanced diagnostic criteria in landscape syndromes can strongly help to find the effects on human well-being. The passage from sick care to health care can't avoid the mentioned upgrading.

Landscape Bionomics Biological-Integrated Landscape Ecology Vittorio Ingegnoli, 2015-03-03. Landscape Bionomics or Bio integrated Landscape Ecology radically transforms the main principles of traditional Landscape Ecology by recognizing the landscape as a living entity rather than merely the spatial distribution of species and communities on the territory often analysed in separate themes: water, species, pollution, etc. To be more exact, the landscape is identified as the life organization integrating a set of plants, animals, and human communities and its system of natural, semi-natural, and human cultural ecosystems in a certain spatial configuration. This new perspective inevitably leads to significant changes in how to assess and manage the environment. This book represents the culmination of an endeavor begun by the author with the support of Richard Forman and Zev Naveh more than a dozen years ago. It builds on the author's previous successful publication *Landscape Ecology: A Widening Foundation* by addressing a range of additional topics and discussing the new theoretical and methodological concepts that have emerged during the past decade of research. Particular attention is paid to the fact that interventions in the landscape can be made with the best intentions yet cause serious damage. Against this background, the author explains the need to study landscape units by applying methods comparable to those used in clinical diagnosis; hence, ecologists can be viewed as the physicians of ecological systems.

The Systemic Turn in Human and Natural Sciences Lucia Urbani Ulivi, 2018-12-14. This book is dedicated to the consolidation and to the expansion of theoretic systems thinking as a necessary integration of the general reductionist and analytical attitude dominant in our culture. Reductionism and analytical approaches have produced significant results in many fields of contemporary knowledge, giving a great contribution to relevant scientific discoveries and to their technological application, but their validity has been improperly universalized as the only and best methods of knowledge in every domain. It is nowadays clear that analytical or mereological approaches are inadequate to solve many problems and that we should introduce or support the diffusion of new concepts and different research attitudes. A good candidate to support such a shift is the well-known theoretical approach based on the concept of system that no more considers the elementary constituents of an object but the entity emerging from the relations and interactions among its

elementary parts It becomes possible to reconstruct several domains both philosophical and scientific from the systemic point of view introducing fresh ideas in the research in view of a general rational vision of the world on more comprehensive basis This book contributes to the diffusion and evolution of systemic thinking by focusing on two main objectives developing and updating the systemic approach in disciplines currently using it and introducing the systemic perspective in humanistic disciplines where the approach is not widely used The Systemic Turn in Human and Natural Sciences A Rock in the Pond is comprised of ten chapters The chapter authors adopt a trans disciplinary perspective consisting in the recognition and harmonization of the special outlooks that together within the general systemic paradigm gives an ideal unity to the book

Paesaggi rurali AA. VV.,2018-08-29T00:00:00+02:00 1862 207 Diseguaglianze eccellenti. Ricchezza materiale e immateriale nel Lodigiano fra passato e futuro Cafaro,2014 **I mondi di Miyazaki** AA. VV.,2023-11-17T00:00:00+01:00 Questa nuova edizione di I mondi di Miyazaki si arricchisce di un saggio sull'ultimo lavoro realizzato dal maestro dell'animazione Il ragazzo e l'airone 2023 che analizza il film sia dal punto di vista estetico sia da quello della sua storia produttiva e distributiva Il volume si compone inoltre di saggi scritti da studiosi ed esperti di animazione e di cinema giapponese che intrecciano e sviluppano i principali temi messi in campo dalle pellicole di Miyazaki Hayao durante tutta la sua carriera Dal concetto di ucronia a un'analisi storica di Principessa Mononoke dal significato della tecnica al rapporto fra natura e scienza in Si alza il vento fino a uno studio sulle musiche di Hisaishi Joe Completano questa edizione contributi che affrontano due manga realizzati da Miyazaki Nausica della Valle del vento e Il viaggio di Shuna Ecoterritorialismo Alberto Magnaghi,Ottavio Marzocca,2023-07-04 Ecoterritorialismo la definizione matura del lungo percorso scientifico di ricerca azione che la scuola territorialista italiana ha iniziato negli anni 90 mettendo il territorio e la sua patrimonializzazione al centro delle alternative ai processi di deterritorializzazione e di urbanizzazione omologante del pianeta messi in atto dalla globalizzazione economico finanziaria La fondazione nel 2011 della Società dei Territorialisti e delle Territorialiste ha rafforzato la multidisciplinarietà dell'approccio e la sua componente operativa con lo strumento della bioregione urbana Il prefisso eco denota la priorità attribuita alla questione ecologica alle relazioni fra umani e non umani viventi e non viventi nei processi di rigenerazione dei luoghi del mondo che cerchiamo di attivare Carabid Beetles: Ecology and Evolution K. Desender,M. Dufrêne,M. Loreau,M.L. Luff,J-P. Maelfait,2013-04-17 The Carabidae form one of the largest and best studied families of insects occurring in nearly every terrestrial habitat The contributions included in this book cover a broad spectrum of recent research into this beetle family with an emphasis on various aspects of ecology and evolution They deal both with individual carabid species for example in studies on population and reproductive biology or life history in general and with ground beetle communities as exemplified in papers treating assemblages in natural habitats on agricultural land and in forests Disciplines range from biogeography and faunistics over morphology taxonomy and phylogenetics ecophysiology and functional ecology to population community conservation and landscape ecology This volume is the result

of the 8th European Carabidologists Meeting 2nd International Symposium of Carabidology September 1 4 1992 Belgium

Bionomia Del Paesaggio Book Review: Unveiling the Magic of Language

In an electronic digital era where connections and knowledge reign supreme, the enchanting power of language has become much more apparent than ever. Its power to stir emotions, provoke thought, and instigate transformation is truly remarkable. This extraordinary book, aptly titled "**Bionomia Del Paesaggio**," written by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound effect on our existence. Throughout this critique, we will delve to the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
