National Transportation Safety Board,2008 On April 12 2007 about 0043 eastern daylight time a Bombardier Canadair Regional Jet CRJ CL600 2B19 N8905F operated as Pinnacle Airlines flight 4712 ran off the departure end of runway 28 after landing at Cherry Capital Airport TVC Traverse City Michigan There were no injuries among the 49 passengers including 3 lap held infants and 3 crewmembers and the aircraft was substantially damaged Weather was reported as snowing The airplane was being operated under the provisions of 14 Code of Federal Regulations Part 121 and had departed from Minneapolis St Paul International Wold Chamberlain Airport Minneapolis Minnesota about 2153 central daylight time Instrument meteorological conditions prevailed at the time of the accident flight which operated on an instrument flight rules flight plan The National Transportation Safety Board NTSB determines that the probable cause of this accident was the pilots decision to land at TVC without performing a landing distance assessment which was required by company policy because of runway contamination initially reported by TVC ground operations personnel and continuing reports of deteriorating weather and runway conditions during the approach This poor decision making likely reflected the effects of fatigue produced by a long demanding duty day and for the captain the duties associated with check airman functions Contributing to the accident were 1 the Federal Aviation Administration pilot flight and duty time regulations that permitted the pilots long demanding duty day and 2 the TVC operations supervisor s use of ambiguous and unspecific radio phraseology in providing runway braking information P ix **Aircraft Accident Report** United States. National Transportation Safety Board,2007 On August 27 2006 about 0606 35 eastern daylight time Comair flight 5191 a Bombardier CL 600 2B19 N431CA crashed during takeoff from Blue Grass Airport Lexington Kentucky The flight crew was instructed to take off from runway 22 but instead lined up the airplane on runway 26 and began the takeoff roll The airplane ran off the end of the runway and impacted the airport perimeter fence trees and terrain The captain flight attendant and 47 passengers were killed and the first officer received serious injuries The airplane was destroyed by impact forces and postcrash fire The flight was operating under the provisions of 14 Code of Federal Regulations Part 121 and was en route to Hartsfield Jackson Atlanta International Airport Atlanta Georgia Night visual meteorological conditions prevailed at the time of the accident The National Transportation Safety Board determines that the probable cause of this accident was the flight crewmembers failure to use available cues and aids to identify the airplane s location on the airport surface during taxi and their failure to cross check and verify that the airplane was on the correct runway before takeoff Contributing to the accident were the flight crew s nonpertinent conversation during taxi which resulted in a loss of positional awareness and the Federal Aviation Administration s FAA failure to require that all runway crossings be authorized only by specific air traffic control ATC clearances The safety issues

discussed in this report focus on the need for 1 improved flight deck procedures 2 the implementation of cockpit moving map displays or cockpit runway alerting systems 3 improved airport surface marking standards and 4 ATC policy changes in the areas of taxi and takeoff clearances and task prioritization Safety recommendations concerning these issues are addressed to the FAA P x Aircraft Accident Report, 197?
