

Les principes de pliage à la machine

(Sources : Heidelberg - Techniques de pliage - impression-juillet 2004)

Deux techniques sont courantes pour l'opération de pliage mécanique : le pliage par couteaux et le pliage par poches. Il est possible d'utiliser un de ces deux principes seul ou de combiner les deux techniques dans une machine.

1. Le pliage par couteaux

Ce procédé nécessite un couteau verticalement amovible et deux cylindres de pliage contre-rotatifs. En passant par le groupe de pliage, la feuille est transportée du margear jusqu'à la butée de feuilles et, après un bref temps de séjour, elle est prise entre les cylindres par la descente verticale du couteau de pliage. L'action des cylindres contre-rotatifs permet ainsi de former le pli. La vitesse de pliage est fonction de la cadence du couteau. L'écart entre les deux cylindres de pliage doit absolument correspondre à l'épaisseur du papier à plier.

2. Le pliage par poches

Pour cette technique de pliage, il faut une poche et trois cylindres pour former un groupe. Les deux premiers cylindres verticalement superposés introduisent la feuille dans la poche jusqu'à la butée de feuilles qui est réglable à volonté. La feuille est introduite dans la poche avec une vitesse adaptée à la qualité du papier. Lorsque le bord avant de la feuille arrive sur la butée, la feuille continue son avancée et un pli à refoulement se produit entre les deux cylindres contre-rotatifs du bas. Ce pliage se fait en continu, il n'est donc pas lié à une certaine cadence d'où résultent les rendements de pliage importants. Chaque groupe de pliage standard peut recevoir jusqu'à 6 poches placées alternativement en haut ou en bas. Les poches non utilisées sont remplacées par des déflecteurs de feuilles qui permettent ainsi de sauter une ou plusieurs poches.

3. Pliures combinées

La plieuse combinée est la combinaison d'une plieuse à poches et d'une plieuse à couteaux. Il est ainsi possible d'utiliser les avantages des deux systèmes sur une seule machine. Les plieuses combinées ont une très grande flexibilité et sont peu encombrantes. Les plieuses d'aujourd'hui travaillent avec des réglages électroniques, un asservissement et un contrôle permanent de la production. Le déplacement des feuilles imprimées et des feuilles pliées est facilité par différents margear et systèmes de sortie.
