ability to reason in unplanned imprecise and uncertain situations on the other hand the human operator can be unpredictable and create disturbances in the automated system The first part of the book is dedicated to the methods of human centered design from three different points of view the various chapters focusing on models developed by human engineers and functional models to explain human behavior in their environment models of cognitive psychology and models in the domain of automobile driving Part 2 develops the methods of evaluation of the human machine systems looking at the evaluation of the activity of the human operator at work and human error analysis methods Finally Part 3 is dedicated to human machine cooperation where the authors show that a cooperative agent comprises a know how and a so called know how to cooperate and show the way to design and evaluate that cooperation in real industrial contexts

Multimodal electronic textiles for intelligent human-machine interfaces Xiao Wei,Xiaotong Liang,Chongguang Meng,Shuze Cao,Qiongfeng Shi,Jun Wu,2023-05-18 Smart wearable electronic devices capable of information exchanging such as human machine interfaces have developed into key carriers for the interconnection intercommunication and interaction between humans and machines Multimodal electronic textiles that incorporate multifunctional sensors into daily clothing are an emerging technology to realize smart wearable electronics This has greatly advanced human machine interface technology by bridging the gap between wearing comfort and traditional wearable electronic devices which will facilitate the rapid development and wide application of natural human machine interfaces In this article we provide a comprehensive summary of the latest research progress on multimodal electronic textiles for intelligent human machine interfaces Firstly we introduce the most representative electronic textile manufacturing strategies in terms of functional fiber preparation and multimodal textile forming Then we explore the multifunctional sensing capability of multimodal electronic textiles and emphasize their advanced applications in intelligent human machine interfaces Finally we present new insights on the future research directions and the challenges faced in practical applications of multimodal electronic textiles
