Translation, Brains and the Computer Bernard Scott, 2018-06-06 This book is about machine translation MT and the classic problems associated with this language technology It examines the causes of these problems and for linguistic rule based systems attributes the cause to language s ambiguity and complexity and their interplay in logic driven processes For non linguistic data driven systems the book attributes translation shortcomings to the very lack of linguistics It then proposes a demonstrable way to relieve these drawbacks in the shape of a working translation model Logos Model that has taken its inspiration from key assumptions about psycholinguistic and neurolinguistic function The book suggests that this brain based mechanism is effective precisely because it bridges both linguistically driven and data driven methodologies It shows how simulation of this cerebral mechanism has freed this one MT model from the all important classic problem of complexity when coping with the ambiguities of language Logos Model accomplishes this by a data driven process that does not sacrifice linguistic knowledge but that like the brain integrates linguistics within a data driven process As a consequence the book suggests that the brain like mechanism embedded in this model has the potential to contribute to further advances in machine translation in all its technological instantiations Using Comparable Corpora for Under-Resourced Areas of

Machine Translation Inguna Skadiņa, Robert Gaizauskas, Bogdan Babych, Nikola Ljubešić, Dan Tufiş, Andrejs Vasiljevs, 2019-02-06 This book provides an overview of how comparable corpora can be used to overcome the lack of parallel resources when building machine translation systems for under resourced languages and domains It presents a wealth of methods and open tools for building comparable corpora from the Web evaluating comparability and extracting parallel data that can be used for the machine translation task It is divided into several sections each covering a specific task such as building processing and using comparable corpora focusing particularly on under resourced language pairs and domains The book is intended for anyone interested in data driven machine translation for under resourced languages and domains especially for developers of machine translation systems computational linguists and language workers It offers a valuable resource for specialists and students in natural language processing machine translation corpus linguistics and computer assisted translation and promotes the broader use of comparable corpora in natural language processing and computational linguistics

The Reading Turn-Around with Emergent Bilinguals Amanda Claudia Wager, Lane W. Clarke, Grace Enriquez, Camille M. Garcia, Rebecca Reynolds, 2019 This practical resource will help K 6 practitioners grow their literacy practices while also meeting the needs of emergent bilingual learners Building on the success of The Reading Turn Around this book adapts the five part framework for reading instruction to the specific needs of emergent bilinguals Designed for teachers who have not specialized in bilingual instruction the authors provide an accessible introduction to differentiating instruction that focuses on utilizing students strengths identities and cultural backgrounds to foster effective literacy instruction Chapters include classroom vignettes teacher exercises illustrations of powerful reading plans for the student and

teacher resources for culturally and linguistically diverse children's literature and tools to engage with students' families and communities. Book Features Grounded in current theories and research in the teaching and learning of literacy as it relates to emerging bilingual learners. Accessible to K-6 educators, ESL and bilingual teachers, principals, literacy coaches, and curriculum developers. Borrows from the framework of Comber and Kamler's 2005 turn around pedagogies which draws on student's strengths and assets to support teachers in improving their classroom practices. Emphasizes student-centered practices that are rooted in a child's identity as a reader and language learner. Based on Freebody and Luke's Four Resources Model (1990, 1999) but also includes a fifth dimension that foregrounds issues of identity.

Literacy Assessment and Instructional Strategies Kathy B. Grant, Sandra E. Golden, Nance S. Wilson, 2014-08-07. Literacy Assessment and Instructional Strategies by Kathy B. Grant, Sandra E. Golden, and Nance S. Wilson prepares literacy educators to conduct reading and writing assessments and develop appropriate corrective literacy strategies for use with their grade K-5 students. Connecting Common Core Literacy Learning Standards to effective strategies and creative activities, the book includes authentic literacy assessments and formal evaluations to support reading teaching in the elementary classroom. Initial chapters discuss literacy assessment and evaluation, data-driven instruction, high-stakes testing, and instructional shifts in teaching reading. Subsequent chapters focus on the latest instructional and assessment shifts, including pre-assessing literacy knowledge bases using informational texts for vocabulary development and close reading of text. Written by reading practitioners and researchers, this book is a must-have for novices as well as for veteran classroom teachers who want to stay on top of changing literacy trends.
