It deals with various resource recovery possibilities from numerous waste streams such as municipal solid hazardous waste, human faecal sludge, construction and demolition waste, and electronic waste. The practical issues of resource recovery and possible remedies derived through on-site practice and experience are incorporated. It includes real-life feasibility analysis and implementation of waste-to-energy systems supported by case studies. Features: Provides comprehensive discussion on both energy and material recovery. Addresses the missing linkage between the techno-commercial feasibility of existing systems and environmental impact. Discusses techno-commercial feasibility and environmental impacts. Offers balance between theoretical knowledge sharing and practical execution-related issues. Includes case study, LCA, and technical feasibility chapters.
