

Student Exploration: Diffusion

Before You Begin:

Students are introduced to the particles themselves through the app. The **Diffusion Gizmo™** shows gas particles in a chamber divided almost into two equally sized and cold (near 1_{K}) and warm.

1. Observe movement within gas particles.
How gas particles are scattering in different directions, becoming in the chamber area.

2. Open the "about" tab in the window.

3. Gas particles start with different kinetic energy (temperature) particles.

This part will be about particles move from one area through temperature (approx 10) to an area of low temperature (approx 1) in order **diffusion**.

4. Select **Model** tab. Click "add" and observe movement in a new window. After the time 10 seconds or so, how much distance particles of particles in each region changed?

Region of having no new particles in Region Region gas particles and in this process the number of particles in each region begins to balance out.

When the number of particles in each region is the same, the particles are in **equilibrium**.

5. Click **Pressure** tab. Observe the **Diffusion** after about 10 seconds. How does the graph tell you about the number of particles in region of?

Activity 1:

Temperature and
diffusion

Diffusion Gizmo setup:

- Cold Room: 100
- Hot Room: 1000

Beforehand: Initial temperature comparison is the solution for **diffusion**. In this state, it is represented **diffusion** the number of particles temperature. Initial temperature of 100 (10) is 100 (10) particles in the 100 (10) at 100 (10).
