Arbatel Concerning The Magic Of Ancients:

Arbatel Joseph Peterson, 2009 In many ways *Arbatel* is unique among texts on magic Unlike the vast majority of writings it is clear concise and elegantly written The practical instructions are straightforward and undemanding When it first appeared in 1575 it attracted the attention of people with a surprisingly broad range of agendas including some of the finest minds of the time Often quoted and reprinted both praised and condemned its impact on western esoteric philosophy has been called overwhelming *Arbatel*'s magic is full of wonder and free from the sinister elements usually associated with texts on the subject But it is about more than magic filled with gnomic wisdom it urges us to help our neighbors be positive and grateful and use time wisely Above all it teaches us to pay attention looking for the wondrous and miraculous In fact to the author this virtually defines the magus Included are illustrations bibliography index and original Latin text First English translation published since in 1655

Magical Manuscripts in Early Modern Europe Daniel Bellingradt, Bernd-Christian Otto, 2017-08-31 This book presents the story of a unique collection of 140 manuscripts of learned magic that was sold for a fantastic sum within the clandestine channels of the German book trade in the early eighteenth century The book will interpret this collection from two angles as an artefact of the early modern book market as well as the longue durée tradition of Western learned magic thus taking a new stance towards scribal texts that are often regarded as eccentric peripheral or marginal The study is structured by the apparent exceptionality scarcity and illegality of the collection and provides chapters on clandestine activities in European book markets questions of censorship regimes and efficiency the use of manuscripts in an age of print and the history of learned magic in early modern Europe As the collection has survived till this day in Leipzig University Library the book provides a critical edition of the 1710 selling catalogue which includes a brief content analysis of all extant manuscripts The study will be of interest to scholars and students from a variety of fields such as early modern book history the history of magic cultural history the sociology of religion or the study of Western esotericism

Ritual Embodiment in Modern Western Magic Damon Zacharias Lycourinos, 2017-11-15 In the Western world magic has often functioned as an umbrella term for various religious beliefs and ritual practices that seek to influence events by harnessing supernatural power The definition of these myriad occult and esoteric traditions have

however usually come from those that are opposed to its practice notably authorities in religious legal and intellectual spheres This book seeks to provide a new perspective directly from the practitioners of modern Western magic by exploring how a distinctive mode of embodiment and consciousness can produce a transition from an ordinary to a magical worldview Starting with an introduction to the study of magic in the Western academy the book then presents the author's own participant observation of five ethnographic case studies of modern Western magic The focus of these ethnographic case studies is directed towards ideas and methods the informants employ to self legitimise and self represent as magicians It concludes by discussing the phenomenological implications and issues around embodiment that are inherent to the contemporary practice of magic This is a unique insight into the lived experience of practitioners of modern magic As such it will be of keen interest to scholars of the Occult and New Religious Movements as well as Religious Studies academics

In the Room of the Circles Federico Barbierato, 2025-09-22. This book investigates the circulation, regulation, and interpretation of magical texts, focusing on the *Clavicula Salomonis* (Key of Solomon), one of the most sought-after and feared books of the time. Drawing on inquisitorial records, trial proceedings, and archival sources, Federico Barbierato uncovers how these texts were read, copied, and exchanged, illuminating the blurred boundaries between religious orthodoxy, scientific inquiry, and the occult. The Early Modern period was marked by a deep ambivalence toward books of magic, which were revered as sources of hidden knowledge yet condemned as dangerous and subversive. Nowhere was this tension more evident than in Venice, a city where inquisitorial censorship clashed with a vibrant book culture. At the heart of this volume lies a detailed exploration of the people who interacted with magical writings: monks, exorcists, book dealers, artisans, and even suspected heretics, revealing how these texts served multiple purposes, from spiritual protection to financial speculation. By examining how authorities sought to suppress, reinterpret, and sometimes co-opt magical knowledge, the book provides fresh insights into the dynamics of censorship, literacy, and power. Barbierato moves beyond the history of forbidden books to reconstruct a network of exchanges that shaped Early Modern attitudes toward magic and heterodox knowledge. *In the Room of the Circles* will appeal to scholars and students of Early Modern history, book history, religious studies, and intellectual history, as well as readers interested in the history of censorship and the relationship between knowledge and power.
