Visual Research Jerome W. Crowder, Jonathan S. Marion, 2020-06-11. *Visual Research: A Concise Introduction to Thinking Visually* is the first text to present a concise overview of the significant ethical, theoretical, and practical considerations for conducting research with images. The capacity to take photos and video on handheld devices and the ability to store, post, and share such imagery online all offer tremendous opportunities for social research. The rapid development and popularity of such technology means that little technological proficiency is required and even less theoretical and ethical consideration. This book provides an accessible introduction to doing visual research in the social sciences. Beginning with ethical considerations, this book highlights the importance of thinking visually before engaging in visual research. Further themes involve creating, organizing, and using images and are presented so as to help readers think about and work with their own visual data. Boxed case studies and further reading suggestions enhance the utility of this primer. Concise and highly focused, *Visual Research* will be an invaluable resource for visual media and communications students and researchers and others interested in visual research in the social sciences.

Advances in Multimedia Information Processing - PCM 2004 Kiyoharu Aizawa, Yuichi Nakamura, Shin'ichi Satoh, 2004-10-29. Welcome to the proceedings of the 5th Pacific Rim Conference on Multimedia (PCM 2004) held in Tokyo Waterfront City, Japan, November 30–December 3, 2004. Following the success of the preceding conferences (PCM 2000 in Sydney, PCM 2001 in Beijing, PCM 2002 in Hsinchu, and PCM 2003 in Singapore), the 5th PCM brought together the researchers, developers, practitioners, and educators in the field of multimedia. Theoretical breakthroughs and practical systems were presented at this conference thanks to the support of the IEEE Circuits and Systems Society, IEEE Region 10, and IEEE Japan Council. ACM SIGMM, IEICE, and ITE. PCM 2004 featured a comprehensive program including keynote talks, regular paper presentations, posters, demos, and special sessions. We received 385 papers, and the number of submissions was the largest among recent PCMs. Among such a large number of submissions, we accepted only 94 oral presentations and 176 poster presentations. Seven special sessions were also organized by world-leading researchers. We kindly acknowledge the great support provided in the reviewing of submissions by the program committee members as well as the additional reviewers who generously gave their time. The many useful comments provided by the reviewing process must have been very valuable for the authors' work. This conference would never have happened without the help of many people. We greatly appreciate the support of our strong organizing committee chairs and advisory chairs. Among the chairs, special thanks go to Dr. Ichiro Ide and Dr. Takeshi Naemura, who smoothly handled publication of the proceedings with Springer. Dr. Kazuya Kodama did a fabulous job as our Web master.
