domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s Hut Pavilion Shrine examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism's forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism

Constructing Professional Discourse Concepción Orna-Montesinos, 2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursive and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced
