Information Technology Law Diane Rowland, 2005 Diane Rowland examines recent developments in criminal law tort contract law and intellectual property rights law that have taken place in response to technological advances and innovations

Information Technology Law Uta Kohl, Andrew Charlesworth, 2013-03-01 This fourth edition of *Information Technology Law* has been completely revised in the light of developments within the field since publication of the first edition in 1997. Now dedicated to a more detailed analysis of and commentary on the latest developments within this burgeoning field of law, this new edition is an essential read for all those interested in the interface between law and technology and the effect of new technological developments on the law. New additions to the fourth edition include analysis of regulatory issues and jurisdictional questions, specific consideration of intermediary liability, developments in privacy and data protection, extension of computer crime laws, developments in software patents, open source software and the legal implications. **Consumer**

Protection and Online Auction Platforms Christine Riefa, 2016-03-03 Online auctions have undergone many transformations and continue to attract millions of customers worldwide. However, these popular platforms remain understudied by legal scholars and misunderstood by legislators. This book explores the legal classification of online auction sites across a range of countries in Europe. Including empirical studies conducted on 28 online auction websites in the UK, the research focusses on the protection of consumers' economic rights and highlights the shortcomings that the law struggles to control. With examinations into important developments including the Consumer Rights Directive and the latest case law from the CJEU on the liability of intermediaries, Riefa anticipates changes in the law and points out further changes that are needed to create a safe legal environment for consumers whilst preserving the varied business model adopted by online auction sites. The study provides insights into how technical measures as well as a tighter legislative framework or enforcement pattern could provide consumers with better protection in turn reinforcing trust and ultimately benefiting the online auction platforms themselves. **New Media and Freedom of Expression** András Koltay, 2019-07-25 The principles of freedom of expression have been developed over centuries. How are they reserved and passed on? How can large internet gatekeepers be required to respect freedom of expression and to contribute actively to a diverse and plural marketplace of ideas? These are key issues for media regulation and will remain so for the foreseeable decades. The book starts with the foundations of freedom of expression and freedom of the press and then goes on to explore the general issues concerning the regulation of the internet as a specific medium. It then turns to analysing the legal issues relating to the three most important gatekeepers whose operations directly affect freedom of expression: ISPs, search engines and social media platforms. Finally, it summarises the potential future regulatory and media policy directions. The book takes a comparative legal approach, focusing primarily on English and American regulations, case law and jurisprudential debates, but it also details the relevant international developments: Council of Europe, European Union as well as the jurisprudence of the European Court of Human

Rights **Consent in European Data Protection Law** Eleni Kosta,2013-03-21 Today consent is a fundamental concept in the European legal framework on data protection The analysis of the historical and theoretical context carried out in this book reveals that consent was not an intrinsic notion in the birth of data protection The concept of consent was included in data protection legislation in order to enhance the role of the data subject in the data protection arena and to allow the data subject to have more control over the collection and processing of his her personal information This book examines the concept of consent and its requirements in the Data Protection Directive taking into account contemporary considerations on bioethics and medical ethics as well as recent developments in the framework of the review of the Directive It further studies issues of consent in electronic communications carrying out an analysis of the consent related provisions of the ePrivacy Directive

The Palgrave Handbook of Education Law for Schools Karen Trimmer,Roselyn Dixon,Yvonne S. Findlay,2018-06-30 This Handbook examines the essential nature of the law within an educational context and asks why there is not greater preparation for this aspect of a teacher s role Principals and teachers across the world now work in increasingly uncertain and challenging environments involving complex legislative frameworks with their roles and responsibilities constantly changing to meet these demands thus it is imperative that educators adapt and acquire new skills relating to child protection and criminal law On a daily basis teachers and practitioners are being challenged to critically examine and evaluate the legal rights and obligations of various stakeholders including students parents educators and administrators However if these skills are not developed the implications will be significant particularly so if principals are deterred from pursuing innovative education strategies due to potential litigation risks Consequently the chapters will empower principals and teachers in the management of these concerns This wide ranging handbook including case studies from around the world will be of interest and value to both scholars of education law and practitioners

Monitoring Laws Jake Goldenfein,2019-10-24 Explores the historical origins and emerging technologies of government profiling and examines law s role in contemporary technological environments

Fundamental Rights Protection Online Bilyana Petkova,Tuomas Ojanen,2020-12-25 Fundamental Rights Protection Online presents an in depth analysis of national supranational and international attempts at online speech regulation illustrating how the law has been unsettled on how to treat intermediaries

Media Freedom and the Law András Koltay,2024-08-01 The main objectives of media regulation in Europe are to protect media freedom to ensure the social responsibility of the media and to prevent harm caused by speech published through the media This book examines the way in which these are reflected in European legal regimes and jurisprudence at the supranational regional and national levels It addresses the theoretical considerations behind the protection and restriction of media freedom It starts from the assumption that there is a common European ideal of media freedom as a human right Apart from EU law and in many cases similar national regulations many common points can be identified across Europe in the theoretical underpinnings of this right and the history of struggles for this freedom in

different European countries also shows common features While the focus is on media freedom in Europe the work also discusses the uniquely distinct concept of freedom of expression and of the media that is prevalent in the US the principles of which have a significant impact in Europe The book uses a comparative method in part as it attempts to outline the common regulatory framework for the idea of media freedom on a European scale The reference to national laws and court decisions is intended to illustrate this picture looking primarily at what binds European states together The work will be a valuable resource for those working in the areas of public law media law media studies comparative law international human rights law and legal philosophy

Legislative Drafting Aldo Zammit Borda, 2013-10-31 Legislative drafting is an extremely onerous exacting and highly skilled task What is clearly conceived in the mind may not be easily expressed with clarity and precision in words It is a highly technical discipline and one of the most vigorous forms of writing Few lawyers have the special combination of skills aptitudes and temperament necessary for a competent draftsman This book provides for the first time detailed commentary on legislative drafting with a specific focus on the Commonwealth covering the ethics of legislative drafting teaching training and retention of drafters the role of legislative drafting in good governance keeping the statute book up to date drafting by more than words the use of graphics labels and formulae in legislation and the particular challenges of drafting for small states It constitutes a key reference for legislative drafters parliamentary counsel and professionals involved in this field in the Commonwealth and beyond This book was based on a special issue of Commonwealth Law Bulletin
