*Doing Physics with Scientific Notebook* Joseph Gallant, 2012-05-29 The goal of this book is to teach undergraduate students how to use Scientific Notebook (SNB) to solve physics problems SNB software combines word processing and mathematics in standard notation with the power of symbolic computation As its name implies SNB can be used as a notebook in which students set up a math or science problem write and solve equations and analyze and discuss their results Written by a physics teacher with over 20 years experience this text includes topics that have educational value fit within the typical physics curriculum and show the benefits of using SNB This easy to read text Provides step by step instructions for using Scientific Notebook (SNB) to solve physics problems Features examples in almost every section to enhance the reader's understanding of the relevant physics and to provide detailed instructions on using SNB Follows the traditional physics curriculum so it can be used to supplement teaching at all levels of undergraduate physics Includes many problems taken from the author's class notes and research Aimed at undergraduate physics and engineering students this text teaches readers how to use SNB to solve some everyday physics problems

**Basic Semiconductor Physics** Chihiro Hamaguchi, 2013-04-17 More than 50 years have passed since the invention of the transistor in December 1947 The study of semiconductors was initiated in the 1930s but we had to wait for 30 years till the 1960s to understand the physics of semiconductors When the transistor was invented it was still unclear whether germanium had a direct gap or indirect gap The

author started to study semiconductor physics in 1960 and the physics was very difficult for a beginner to understand. The best textbook of semiconductors at that time was *Electrons and Holes in Semiconductors* by W Shockley but it required a detailed knowledge of solid state physics to understand the detail of the book. In that period junction transistors and Si bipolar transistors were being produced on a commercial basis and industrialization of semiconductor technology was progressing very rapidly. Later semiconductor devices were integrated and applied to computers successfully resulting in a remarkable demand for semiconductor memories in addition to processors in the late 1970s to 1980s. Now we know that semiconductors play the most important role in information technology as the key devices and we cannot talk about the age of information technology without semiconductor devices. On the other hand the physical properties of semiconductors such as the electrical and optical properties were investigated in detail in the 1950s leading to the understanding of the energy band structures.

**Dr. Dobb's Journal**, 2002 *Science and Technology of Terrorism and Counterterrorism* Thomas M. Haladyna, 2009-11-04. Traditionally resources on terrorism and counterterrorism tend to focus on the social, behavioral and legal aspects of the subject with minimal emphasis on the scientific and technological aspects. Taking into account these practical considerations the second edition of *Science and Technology of Terrorism and Counterterrorism* discusses the natu
