A Place In The Shade Charles Correa:

A Place in the Shade Charles Correa, 2010 Indian cities are mechanisms for social engineering more powerful than anything we have seen before They will transform this country A Place in the Shade explores architectural and urban issues in India from the house as a machine for dealing with our often hostile climate to the metaphysical role of architecture as a Model of the Cosmos This reflective provocative and consistently readable collection of essays argues that our habitat must respond to the overriding parameters of climate culture and financial resources and that our physical environment should accommodate notions of inclusion and diversity and that priceless quality of synergy which characterizes a city Charles Correa identifies the defining issues of the urbanization process that is so rapidly transforming India He writes You cannot look at cities without wandering into architecture on the one hand and politics on the other Tragically over the last few decades urban real estate has become the primary source of financing for political parties and the politicians who run them But our towns and cities are assets too precious to be squandered in this manner Like the wheat fields of Punjab and the coal fields of Bihar cities are a crucial part of our national wealth Their success or their failure will determine our future Indian cities are mechanisms for social engineering more powerful than anything we have seen before They will transform this country A Place in the Shade explores architectural and urban issues in India from the house as a machine for dealing with our often hostile climate to the metaphysical role of architecture as a Model of the Cosmos

The ineffable in Charles Correa Edoardo Narne, 2021-11-18 Charles Correa seen by many in India as a sort of guru as someone capable to transcend and grasp the ineffable reality that surrounds us has left his noteworthy architectural heritage across the globe In 2013 the Royal Institute of British Architects RIBA celebrated him as one of the greatest contemporary urban planners showcasing his work in an exhibition called Charles Correa India's greatest architect Profoundly tied to my Indian origins to me Correa has been the master over distance a personal benchmark to set my goals against He was my inspiring thinker architect and urbanist or simply said the designer I would have liked to be Many of Correa's last works show his deep rooted search of the highest spiritual dimension in the attempt to trap part of the cosmic energy surrounding us into architectural works that were and are the shadow of his soul

Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to

material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies
