Although some organizations are able to practice agile methods in the near pure form most are not reflecting just how radically innovative these methods are to this day. Any innovation must coexist with an existing environment and agile software development is no different. There are numerous challenges confronting IT and software development organizations today with many solutions pitched by a cadre of advocates. Be it CMM, offshoring, outsourcing, security or one of many other current topics in the industry, teams using or transitioning to Extreme Programming and other agile practices must integrate with the rest of the organization in order to succeed. The papers here offer some of the latest experiences that teams are having in those efforts. XP Agile Universe 2004 consisted of workshops, tutorials, papers, panels, the Open Space session, the Educators Symposium, keynotes, educational games and industry presentations.
