An Introduction To Duplicate Detection An Introduction To Duplicate Detection:

An Introduction to Duplicate Detection Feliz Nauman, Melanie Herschel, 2010-05-05 With the ever increasing volume of data data quality problems abound Multiple yet different representations of the same real world objects in data duplicates are one of the most intriguing data quality problems The effects of such duplicates are detrimental for instance bank customers can obtain duplicate identities inventory levels are monitored incorrectly catalogs are mailed multiple times to the same household etc Automatically detecting duplicates is difficult First duplicate representations are usually not identical but slightly differ in their values Second in principle all pairs of records should be compared which is infeasible for large volumes of data This lecture examines closely the two main components to overcome these difficulties i Similarity measures are used to automatically identify duplicates when comparing two records Well chosen similarity measures improve the effectiveness of duplicate detection ii Algorithms are developed to perform on very large volumes of data in search for duplicates Well designed algorithms improve the efficiency of duplicate detection Finally we discuss methods to evaluate the success of duplicate detection Table of Contents Data Cleansing Introduction and Motivation Problem Definition Similarity Functions Duplicate Detection Algorithms Evaluating Detection Success Conclusion and Outlook Bibliography **Web-Age**

Information Management Haixun Wang, Shijun Li, Satoshi Oyama, Xiaohua Hu, Tiejun Qian, 2011-08-26 This book constitutes the refereed proceedings of the 12th International Conference on Web Age Information Management WAIM 2011 held in Wuhan China in September 2011 The 53 revised full papers presented together with two abstracts and one full paper of the keynote talks were carefully reviewed and selected from a total of 181 submissions The papers are organized in topical sections on query processing uncertain data social media semantics data mining cloud data multimedia data user models data management graph data name disambiguation performance temporal data XML spatial data and event detection

Database and Expert Systems Applications Hendrik Decker, Lenka Lhotská, Sebastian Link, Marcus Spies, Roland R. Wagner, 2014-08-20 This two volume set LNCS 8644 and LNCS 8645 constitutes the refereed proceedings of the 25th International Conference on Database and Expert Systems Applications DEXA 2014 held in Munich Germany September 1 4 2014 The 37 revised full papers presented together with 46 short papers and 2 keynote talks were carefully reviewed and selected from 159 submissions The papers discuss a range of topics including data quality social web XML keyword search skyline queries graph algorithms information retrieval XML security semantic web classification and clustering queries social computing similarity search ranking data mining big data approximations privacy data exchange data integration web semantics repositories partitioning and business applications **Multimedia Communications, Services and Security** Andrzej Dziech, Mikołaj Leszczuk, Remigiusz Baran, 2015-12-01 This volume constitutes the refereed proceedings of the 8th International Conference on Multimedia Communications Services and Security MCSS 2015 held in Krakow Poland in November 2015 The 16 full papers included in the volume were selected from 39 submissions The papers cover ongoing

research activities in the following topics multimedia services intelligent monitoring audio visual systems biometric applications experiments and deployments
