An Introduction To Agroforestry An Introduction To Agroforestry:

An Introduction to Agroforestry P. K. R. Nair, 1993-07-31 This college level textbook summarizes the state of current knowledge in the rapidly expanding field of agroforestry. The book is organized into 25 chapters in six sections, reviews the developments in agroforestry during the past 15 years, and describes the accomplishments in the application of biophysical, plant, and soil related, and socioeconomic sciences to agroforestry. Although the major focus of the book is on the tropics, where the practice and potential of agroforestry are particularly promising, the developments in temperate zone agroforestry are also discussed. This text is recommended for students, teachers, and researchers in agroforestry, farming systems, and tropical land use.

An Introduction to Agroforestry P. K. Ramachandran Nair, B. Mohan Kumar, Vimala D. Nair, 2022-01-12 Agroforestry, the practice of growing trees and crops in interacting combinations, is recognized the world over as an integrated approach to sustainable land use. Agroforestry systems being multifunctional facilitate not only the production of food and wood products but also provide a variety of ecosystem services such as climate change mitigation, biodiversity conservation, and soil quality improvement. Agroforestry research has made rapid strides since organized efforts started in the late 1970s. Today a vast body of scientific knowledge and an impressive array of publications on agroforestry are available. Four World Congresses on Agroforestry conducted once every five years since 2004 have brought together the global community of agroforestry professionals and practitioners to share and discuss the emerging trends and paradigm shifts in this field. The fifth Congress is scheduled to be held in Quebec, Canada. However, a comprehensive college level textbook incorporating these research findings did not exist until this book was first published. The first edition of this book in 1993, Nair P. K. R. 1993, is out of print and somewhat dated. This revised edition, with emphasis on the scientific developments during the past more than four decades, addresses this long felt need.

An Introduction to Agroforestry P. K. Ramachandran Nair, 1993-08-14 Agroforestry has come of age during the past fifteen years. During this period, activities and interest in agroforestry education and training have increased tremendously, as in other aspects of agroforestry development. Today agroforestry is taught at the senior undergraduate and postgraduate levels in many institutions around the world, either as a separate subject or as a part of the regular curricula of agriculture, forestry, ecology, and other related programs. Although several books on the subject have been published during the past few years, there is still no single publication that is recognized as a textbook. This book is an effort to make up for this deficiency. The need for such a book became obvious to me when I was faced with the task of teaching a graduate level course in agroforestry at the University of Florida five years ago. Subsequently, the Second International Workshop on Professional Education and Training, held here at the University of Florida in December 1988, recommended that the preparation of an introductory textbook be undertaken as a priority activity for supporting agroforestry education world wide. The various educational and training courses that I have been involved in, and my interactions with several instructors and students of agroforestry in different parts of the world, further motivated me.
