An Introduction To Metaphysics:

An Introduction to Metaphysics Jack S. Crumley II, 2021-12-09 An Introduction to Metaphysics offers an engrossing survey of central metaphysical topics including truth universals the nature of mind personal identity free will time and the existence of God The book is pitched at an intermediate undergraduate level and is suitable for students without background knowledge in these areas Topically organized it examines a variety of historical and contemporary positions relevant to each of the included themes Memorable and amusing drawings by Gillian Wilson are interspersed throughout the text to illustrate concepts and examples

An Introduction to Metaphysics Martin Heidegger, 1999-01-01 This book contains a series of lectures delivered by Heidegger in 1935 at the University of Freiburg In this work Heidegger presents the broadest and the most intelligible account of the problem of being as he sees this problem First he discusses the relevance of it by pointing out how this problem lies at the root not only of the most basic metaphysical questions but also of our human existence in its present historical setting Then after a short digression into the grammatical forms and etymological roots of the word being Heidegger enters into a lengthy discussion of the meaning of being in Greek thinking letting pass at the same time no opportunity to stress the impact of this thinking about being on subsequent western speculation His contention is that the meaning of being in Greek thinking underwent a serious restriction through the opposition that was introduced between being on one hand and becoming appearance thinking and values on the other *The Creative Mind* Henri

Bergson, 2012-04-12 The Nobel Laureate discusses not only how and why he became a philosopher but also his conception of philosophy as a field distinct from science and literature

An Introduction to Metaphysics John W. Carroll, Ned Markosian, 2010-04-08 Discusses and invites students to reflect on topics such as causation freedom and determinism laws of nature and material objects

An Introduction to Metaphysics C. H. Whiteley, 2019-03-06 Originally published in 1950 For those interested in the fundamental problems of philosophy but not familiar with its technicalities this book introduces the main type of theory in metaphysics not by a catalogue of philosophers opinions but by a continuous train of reasoning The central theme is the problem of the relation between Mind and Matter and in the course of the argument there are discussions of mechanistic materialism of idealism and our knowledge of the external world and of the arguments for the existence of God The problems are presented lucidly but without over simplification
