Vocabulary

1. Adaptive radiation (be able to identify examples, and why it would occur):
 - o Adaptive radiation- the evolution of many diverse species from a single common ancestor
 - Occurs when an environment has many different habitats with their own evolutionary pressures
 - After a mass extinction, where they have to fill all the ecological niches
 - o Ex. finches on the Galapagos Islands
 - A single species of finch reached the island first. Then, as the finches settled on each of the islands, they diverged from each other as they adapted to the distinct environments of each island
2. Agonistic behavior (be able to identify examples):
 - o Agonistic behavior- confrontational behavior that settles disputes over limited resources, such as food, mates, or territory; essentially tests of strength
 - Agonistic behavior uses ritualized contests instead of real combat because combat is energy-intensive and reduces fitness
 - Arm wrestling is cheaper than a gunfight
 - o Ex. dogs growl to warn intruders off of its territory
3. Analogy (be able to identify examples):
 - o Analogy- similarity due to convergent evolution
 - o Ex. Australian moles and North American moles look similar despite appearing on completely different continents. This occurred because their environments (or evolutionary pressures) are similar.
4. Artificial selection (be able to identify examples):
 - o Artificial selection- evolutionary pressures are humans

School of education,1928-06 *Biology* Edward C. Gruber,1963 **Exploring Technology-Infused Education in the Post-Pandemic Era** Tomei, Lawrence A.,Carbonara, David D.,2024-08-05 In the aftermath of the 2020 2022 pandemic educators find themselves grappling with the decision to revert to traditional instructional methods or embrace the transformative power of 21st century technologies The swift integration of virtual classrooms videoconferencing and social media during the pandemic has left teachers navigating uncharted territory Many who once vehemently resisted technology

now stand on the precipice of a digital revolution in education This dichotomy poses a pressing problem a dearth of documented research and guidance for educators seeking to measure the true value of these technologies in the post pandemic era Exploring Technology Infused Education in the Post Pandemic Era offers guidance and solutions to the challenges faced by educators As teachers stand on the brink of a pivotal decision the research community lags behind in providing the necessary insights to inform their choices The questions loom large What technologies emerged during the pandemic and have they proven effective in the classroom Can these innovations seamlessly coexist with traditional instructional methods The void in documented research leaves educators in a quandary lacking the evidence needed to make informed decisions about the integration of technology into their teaching practices This critical gap impedes progress and hinders the unleashing of the full potential of 21st century educational tools
