Bad Blood James H. Jones, 1993 The modern classic of race and medicine updated with an additional chapter on the Tuskegee experiment's legacy in the age of AIDS      **Bad Blood** James Howard Jones, 1993 The modern classic of race and medicine updated with an additional chapter on the Tuskegee experiment's legacy in the age of AIDS      **Bad Blood** James Howard Jones, Jones, 1992-12-05      *Kenya Today* Ndirangu Mwaura, 2005 Examining the impact of foreign aid trade policies study abroad programs religion entertainment the media and other forms of foreign influence on Kenya and other under developed African nations the author finds that initiatives billed as assistance in many cases serve instead to keep in place the colonial status of dependency Provided by      Pastoral Aesthetics Nathan Carlin, 2019-03-06 It is often said that bioethics emerged from theology in the 1960s and that since then it has grown into a secular enterprise yielding to other disciplines and professions such as philosophy and law During the 1970s and 1980s a kind of secularism in biomedicine and related areas was encouraged by the need for a neutral language that could provide common ground for guiding clinical practice and research protocols Tom Beauchamp and James Childress in their pivotal *The Principles of Biomedical Ethics* achieved this neutrality through an approach that came to be known as principlist bioethics In *Pastoral Aesthetics* Nathan Carlin critically engages Beauchamp and Childress by revisiting the role of religion in bioethics and argues that pastoral theologians can enrich moral imagination in bioethics by cultivating an aesthetic sensibility that is theologically informed psychologically sophisticated therapeutically oriented and experientially grounded To achieve these ends Carlin employs Paul Tillich's method of correlation by positioning four principles of bioethics with four images of pastoral care drawing on a range of sources including painting fiction memoir poetry journalism cultural studies clinical journals classic cases in bioethics and original pastoral care conversations What emerges is a form of interdisciplinary inquiry that will be of special interest to bioethicists theologians and chaplains      **Theory in Health Promotion Research and Practice: Thinking Outside the Box** Patricia Goodson, 2010-10-25 It offers a more critical perspective of existing health promotion theories and challenges the student to create new theoretical frameworks for understanding human health and wellbeing This unique text guides the reader to reflect on the process of thinking theoretically and provides practical strategies for applying theory to research and practice The author employs a narrative perspective and writes in an informal first person style Source inconnue      *Drawing Blood* Keith Wailoo, 2002-10-15 How physicians in this century wielded medical technology to define disease carve out medical specialties and shape political agendas Winner of the American Public Health Association Arthur Visel tear Prize In *Drawing Blood* medical historian Keith Wailoo uses the story of blood diseases to explain how physicians in this century wielded medical technology to define disease carve out medical specialties and shape political agendas As Wailoo's account makes clear the seemingly straightforward process of identifying disease is invariably influenced by personal professional and social factors and as a result produces not only clarity and precision but also bias and outright error

Drawing Blood reveals the ways in which physicians and patients as well as the diseases themselves are simultaneously shaping and being shaped by technology medical professionalization and society at large This thought provoking cultural history of disease medicine and technology offers an important perspective for current discussions of HIV and AIDS genetic blood testing prostate specific antigen and other important issues in an age of technological medicine Makes clear that the high stakes involved in medical technology are not just financial but moral and far reaching They have been harnessed to describe clinical phenomena and to reflect social and cultural realities that influence not only medical treatment but self identity power and authority Susan E Lederer H Net Humanities Social Sciences On Line Wailoo s masterful study of hematology and its disease discourse is a model of interdisciplinarity combining cultural analysis social history and the history of medical ideas and technology to produce a complex narrative of disease definition diagnosis and treatment He reminds us that medical technology is a neutral artifact of history It can be and has been used to clarify and to cloud the understanding of disease and it has the potential both to constrain and to emancipate its subjects Regina Morantz Sanchez Journal of Interdisciplinary History
