

4. Programming

The setting menu is activated with the **menu** key. The display items are selected with the **F**, **T**, and **J** keys. If the menu key is pressed again, the corresponding value for the display item is shown and can be altered with the **F**, **T**, and **J** keys. If the display with the unit is not confirmed within ten minutes, the device automatically returns to the measuring mode without accepting the new value.

To improve programming speed, you can switch back to the measuring mode (primary mode) from any item in the menu by pressing the **0** key, provided for the seconds.

If the software lock has been activated, the values can be shown, but no changes made, i.e. when **Lock On** or **action (LOCK)** appears in the display when an attempt is made to change values.

1. Overview

The pressure switch should be installed and operated only by authorized persons after being switched on by the LOR 7 unit through a battery. The device is mainly operated and configured with three keys on the front.

With the **Alt** key (+) reader you change between the display values and the adjusted / actual values. With the keys **↑**, **↓**, **→** and **←** you change between the display values in the menu or change the values / functions in the menu (see below „List of functions“).

If the display is not confirmed within ten minutes the device automatically returns to the measuring mode. When the software lock is entered, „LOR“ appears in the display when an attempt is made to change values.
