LRFD Bridge Design** Jai B. Kim, 2013 Helping readers prepare for the civil and structural PE exam this book presents
numerous design examples that serve as a comprehensive step by step guide to basic bridge design using the AASHTO LRFD
Bridge Design Specifications Fifth Edition It offers a simplified explanation of load resistance factor design LRFD method
based bridge design principles and lists the AASHTO reference section numbers alongside formulas and where topics are
introduced to refer the reader to the primary source material This is a valuable reference for civil engineering students as
well as for practicing engineers AASHTO LRFD Bridge Design Specifications American Association of State Highway and
Transportation Officials, 1994 The provisions of these Specifications are intended for the design evaluation and rehabilitation
of both fixed and movable highway bridges Mechanical electrical and special vehicular and pedestrian safety aspects of
movable bridges however are not covered Provisions are not included for bridges used solely for railway rail transit or public
utilities For bridges not fully covered herein the provisions of these Specifications may be applied as augmented with
additional design criteria where required These specifications are not intended to supplant proper training or the exercise of
judgment by the Designer and state only the minimum requirements necessary to provide for public safety The Owner or the
Designer may require the sophistication of design or the quality of materials and construction to be higher than the minimum
requirements The concept of safety through redundancy and ductility and protection against scour and collision are
emphasized The design provisions of these Specifications employ the Load and Resistance Factor Design LRFD methodology
The factors have been developed from the theory of reliability based upon current statistical knowledge of loads and
structural performance Methods of analysis other than those included in previous Specifications and the modelling
techniques inherent in them are included and their use is encouraged The commentary is not intended to provide a complete
historical background concerning the development of these or previous Specifications nor is it intended to provide a detailed
summary of the studies and research data reviewed in formulating the provisions of the Specification However references to
some of the research data are provided for those who wish to study the background material in depth The commentary
directs attention to other documents that provide suggestions for carrying out the requirements and intent of these
Specifications However those documents and this commentary are not intended to be a part of these Specifications Page 1 1
