The Project Risk Maturity Model Martin Hopkinson, 2017-03-02 Top businesses recognise risk management as a core feature of their project management process and approach to the governance of projects. However, a mature risk management process is required in order to realise its benefits: one that takes into account the design and implementation of the process and the skills, experience and culture of the people who use it. To be mature in the way you manage risk, you need an accepted framework to assess your risk management maturity, allowing you to benchmark against a recognised standard. A structured pathway for improvement is also needed, not just telling you where you are now but describing the steps required to reach the next level. The Project Risk Maturity Model detailed here provides such an assessment framework and development pathway. It can be used to benchmark your project risk processes and support the introduction of effective in-house project risk management. Using this model, implementation and improvement of project risk management can be managed effectively to ensure that the expected benefits are achieved in a way that is appropriate to the needs of each organisation. Martin Hopkinson has developed The Project Risk Maturity Model into a robust framework, and this book allows you to access and apply his insights and experience. A key feature is a downloadable resource containing a working copy of the QinetiQ Project Risk Maturity Model (RMM). This will enable you to undertake maturity assessments for as many projects as you choose. The RMM has been proven over a period of 10 years with at least 250 maturity assessments on projects and programmes with a total value exceeding 60 billion. A case study in the book demonstrates how it has been used to deliver significant and measurable benefits to the performance of major projects.

However, this new edition has been updated to include revisions to the CDM regulations, changes to the standard forms of contract and other documentation used by the project manager, the impact of BIM and emerging technologies, implications of Brexit on EU public procurement, other new procurement trends and ethics, and the project manager. Construction project management activities are tackled in the order they occur on real projects, with reference made to the RIBA Plan of Work throughout.
