Approaches to Social Enquiry Norman Blaikie, 2007-09-24 Since its initial publication this highly respected text has provided students with a critical review of the major research paradigms in the social sciences and the logics or strategies of enquiry associated with them This second edition has been revised and updated *Taking Sides in Social Research* Martyn Hammersley, 2000 The ideal that the goal of social research was the production of objective knowledge and that this required a commitment to value neutrality has been challenged in recent times Here Martyn Hammersley assesses the arguments

characterised by a concern with narrative and that our research data can best be analyzed if it is seen in narrative terms In concrete step by step terms she details for the reader how to go about collecting data and how to subject that data to narrative analysis while at the same time placing this process in its wider theoretical context She works across the traditional quantitative qualitative divide to set out the ways in which narrative researchers can uncover such issues as social change causality and social identity She also shows how the techniques and skills used by qualitative researchers can be deployed when doing quantitative research and similarly how qualitative researchers can sometimes profit from using quantitative skills and techniques This book provides both a fascinating and a challenging read What sets this text apart from other books on research methodology and methods is that it does not focus exclusively on either quantitative or qualitative research approaches but rather attempts to bridge the divide The book should be compulsory reading not only for those aspiring to undertake narrative research and those students undertaking higher degree research courses but also for those more experienced researches wishing to explore contemporary issues in research methods and methodology As a recent recruit to a lecturer practitioner post with little recent experience in the subject area covered by this book i found it met my needs very well I would certainly recommend this book for purchase Dr Andrew Pettipher University of Nottingham UK
