[Soda Politics](#) Marion Nestle, 2015-09-07 Sodas are astonishing products Little more than flavored sugar water these drinks cost practically nothing to produce or buy yet have turned their makers principally Coca Cola and PepsiCo into a multibillion dollar industry with global recognition distribution and political power Billed as refreshing tasty crisp and the real thing sodas also happen to be so well established to contribute to poor dental hygiene higher calorie intake obesity and type 2 diabetes that the first line of defense against any of

these conditions is to simply stop drinking them. Habitually drinking large volumes of soda not only harms individual health but also burdens societies with runaway healthcare costs. So how did products containing absurdly inexpensive ingredients become multibillion dollar industries and international brand icons while also having a devastating impact on public health? In *Soda Politics*, the 2016 James Beard Award for Writing, Coca-Cola and PepsiCo spend billions of dollars each year to promote their sale to children, minorities, and low-income populations in developing as well as industrialized nations. And once they have stimulated that demand, they leave no stone unturned to protect profits. That includes lobbying to prevent any measures that would discourage soda sales, strategically donating money to health organizations and researchers who can make the science about sodas appear confusing and engaging, in Corporate Social Responsibility (CSR) activities to create goodwill, and silence critics. *Soda Politics* follows the money trail wherever it leads, revealing how hard Big Soda works to sell as much of their products as possible to an increasingly obese world. But *Soda Politics* does more than just diagnose a problem; it encourages readers to help find solutions. From Berkeley to Mexico City and beyond, advocates are successfully countering the relentless marketing promotion and political protection of sugary drinks. And their actions are having an impact: for all of the hardball and softball tactics the soft drink industry employs to maintain the status quo, soda consumption has been flat or falling for years. Health advocacy campaigns are now the single greatest threat to soda companies' profits. *Soda Politics* provides readers with the tools they need to keep up pressure on Big Soda in order to build healthier and more sustainable food systems.

Public Values Leadership by Barry Bozeman and Michael M. Crow, 2021-10-12. Instead of private gain or corporate profits, what if we set public values as the goal of leadership? Leadership means many things and takes many forms. But most studies of the topic give little attention to why people lead or to where they are leading us. In *Public Values Leadership*, Barry Bozeman and Michael M. Crow explore leadership that serves public values, that is to say, values that are focused on the collective good and fundamental rights rather than profit, organizational benefit, or personal gain. While nearly everyone agrees on core public values, there is less agreement on how to obtain them, especially during this era of increased social and political fragmentation. How does public values leadership differ from other types of organizational leadership, and what distinctive skills does it require? Drawing on their extensive experience as higher education leaders, Bozeman and Crow wrestle with the question of how to best attain universally agreed-upon public values like freedom, opportunity, health, and security. They present conversations and interviews with ten well-known leaders, people who have achieved public values objectives and who are willing to discuss their leadership styles in detail. They also offer a series of in-depth case studies of public values leadership and accomplishment. Public values leadership can only succeed if it includes a commitment to pragmatism, a deep skepticism about government versus market stereotypes, and a genuine belief in the fundamental importance of partnerships and alliances. Arguing for a mutable leadership, they suggest that different people are leaders at different times and that ideas about natural leaders or all-purpose leaders are off the mark. Motivating readers, including

students of public policy administration and practitioners in public and nonprofit organizations to think systematically about their own values and how these can be translated into effective leadership Public Values Leadership is highly personal and persuasive Data-Driven Innovation Big Data for Growth and Well-Being OECD,2015-10-06 This report improves the evidence base on the role of Data Driven Innovation for promoting growth and well being and provide policy guidance on how to maximise the benefits of DDI and mitigate the associated economic and societal risks *From Networks to Netflix* Derek Johnson,2018-01-03 Even as the television industry experiences significant transformation and disruption in the face of streaming and online delivery the television channel itself persists If anything the television channel landscape has become more complex to navigate as viewers can now choose between broadcast cable streaming and premium services across a host of different platforms and devices *From Networks to Netflix* provides an authoritative answer to that navigational need helping students instructors and scholars understand these industrial changes through the lens of the channel Through examination of emerging services like Hulu and Amazon Prime Video investigation of YouTube channels and cable outlets like Freeform and Comedy Central and critiques of broadcast giants like ABC and PBS this book offers a concrete tangible means of exploring the foundations of a changing industry **Big Hunger** Andrew Fisher,2017-04-14 How to focus anti hunger efforts not on charity but on the root causes of food insecurity improving public health and reducing income inequality Food banks and food pantries have proliferated in response to an economic emergency The loss of manufacturing jobs combined with the recession of the early 1980s and Reagan administration cutbacks in federal programs led to an explosion in the growth of food charity This was meant to be a stopgap measure but the jobs never came back and the emergency food system became an industry In *Big Hunger* Andrew Fisher takes a critical look at the business of hunger and offers a new vision for the anti hunger movement From one perspective anti hunger leaders have been extraordinarily effective Food charity is embedded in American civil society and federal food programs have remained intact while other anti poverty programs have been eliminated or slashed But anti hunger advocates are missing an essential element of the problem economic inequality driven by low wages Reliant on corporate donations of food and money anti hunger organizations have failed to hold business accountable for offshoring jobs cutting benefits exploiting workers and rural communities and resisting wage increases They have become part of a hunger industrial complex that seems as self perpetuating as the more famous military industrial complex Fisher lays out a vision that encompasses a broader definition of hunger characterized by a focus on public health economic justice and economic democracy He points to the work of numerous grassroots organizations that are leading the way in these fields as models for the rest of the anti hunger sector It is only through approaches like these that we can hope to end hunger not just manage it *Off the Derech* Ezra Cappell,Jessica Lang,2020-08-01 In recent years many formerly ultra Orthodox Jews have documented leaving their communities in published stories films and memoirs This movement is often identified as off the derech OTD or off the path with the idea that the path is paved by Jewish law rituals and practices

found within their birth communities This volume tells the powerful stories of people abandoning their religious communities and embarking on uncertain journeys toward new lives and identities within mainstream society Off the Derech is divided into two parts stories and analysis The first includes original selections from contemporary American and global authors writing about their OTD experiences The second features chapters by scholars representing such diverse fields as literature history sociology psychology anthropology religion and gender studies The interdisciplinary lenses provide a range of methodologies by which readers can better understand this significant phenomenon within contemporary Jewish society
