Cauchy's Cours d'analyse Robert E. Bradley, C. Edward Sandifer, 2010-01-14 In 1821 Augustin Louis Cauchy 1789-1857 published a textbook the Cours d'analyse to accompany his course in analysis at the Ecole Polytechnique It is one of the most influential mathematics books ever written Not only did Cauchy provide a workable definition of limits and a means to make them the basis of a rigorous theory of calculus but he also revitalized the idea that all mathematics could be set on such rigorous foundations Today the quality of a work of mathematics is judged in part on the quality of its

rigor and this standard is largely due to the transformation brought about by Cauchy and the Cours d'analyse. For this translation the authors have also added commentary, notes, references, and an index. Augustin-Louis Cauchy Bruno Belhoste, 1991. A Master of Science History Jed Z. Buchwald, 2012-01-05. New essays in science history ranging across the entire field and related in most instances to the works of Charles Gillispie, one of the field's founders. Biographies of Scientists Roger Smith, 1998. Identifies over 500 sources of information about the lives of scientists for young and adult general readers and for scholars. Entries ranging from a quarter to a half page in length explain briefly what the subjects achieved, worthy of biography as well as describing the work in some detail. The works cited include books, encyclopedias, and periodicals, and both biography and autobiography. The arrangement is by discipline; the social sciences are not included with indexes by author and subject. scientist. Annotation copyrighted by Book News, Inc., Portland, OR. Biography Charles Knight, 1867. Decision Making in Social Sciences: Between Traditions and Innovations Daniel Flaut, Šárka Hošková-Mayerová, Cristina Ispas, Fabrizio Maturo, Cristina Flaut, 2019-11-28. This book explores several branches of the social sciences and their perspectives regarding their relations with decision-making processes: computer science, education, linguistics, sociology, and management. The decision-making process in social contexts is based on the analysis of sound alternatives using evaluative criteria. Therefore, this process is one that can be rational or irrational and can be based on knowledge and/or beliefs. A decision-making process always produces a final decision which may or may not imply prompt action and increases the chances of choosing the best possible alternative. The book is divided into four main parts. The concepts covered in the first part on computer science explore how the rise of algorithms and the growth in computing power over the years can influence decision-making processes. In the second part, some traditional and innovative ideas and methods used in education are presented: compulsory schooling, inclusive schools, higher education, etc. In turn, the third part focuses on linguistic aspects and examines how progress is manifested in language. The fourth part on sociology explores how society can be influenced by social norms, human interactions, culture, and religion. Management, regarded as a science of the decision-making process, is explored in the last part of this book. Selected organizations, strategies, objectives, and resources are presented, e.g., human resources, financial resources, and technological resources. The book gathers and presents in a concise format a broad range of aspects regarding the decision-making process in social contexts, making it a valuable and unique resource for the scientific community.
