The Catechumenate in Late Antique Africa (4th -6th centuries) Matthieu Pignot,2020-07-13 In *The Catechumenate in Late Antique Africa 4th 6th centuries* Matthieu Pignot explores how individuals became Christian in ancient North Africa Before baptism converts first became catechumens and spent a significant time of gradual integration into the community through rituals and teaching This book provides the first historical study of this process in African sources from Augustine of Hippo to canon of councils anonymous sermons and 6th century letters Pignot shows that practices varied more than is generally assumed and that catechumens because of their liminal position were a disputed and essential group in the development of Christian communities until the 6th century at least This book demonstrates that the catechumenate is key to understanding the processes of Christianisation and conversion in the West

Prayer after Augustine Jonathan D. Teubner,2018-01-05 The influence of the theology and philosophy of Augustine of Hippo on subsequent Western thought and culture is undisputed *Prayer after Augustine A Study in the Development of the Latin Tradition* argues that the notion of the Augustinian tradition needs to be re thought and that already in the generation after Augustine in the West such a re thinking is already and richly manifest in more than one influential form In this work Jonathan D Teubner encourages philosophical moral and historical theologians to think about what it might mean that the Augustinian tradition formed in a distinctively Augustinian fashion and considers how this affects how they use discuss and evaluate Augustine in their work This is exemplified by Augustine s reflections on prayer and how they were taken up modified and handed on by Boethius and Benedict two critically influential figures for the development of Latin medieval philosophical and theological cultures Teubner analyses and exemplifies the particular theme of prayer and the other topics it constellates in Augustine and to show how it already forms a distinctively Augustinian concept of tradition that was to prove to have fascinatingly diverse manifestations Part I traces the development of Augustine s understanding of prayer Patience and hope as articulated in prayer sit at the centre of Augustine s understanding of Christian existence In Part II Teubner turns to suggest how this is picked up by Boethius and Benedict

Augustine and the Catechumenate William Harmless,2014-12-30 As one of the most influential thinkers in Christian history St Augustine 354 430 had a flair for teaching and meditated deeply on the mysteries of the human heart This study examines a little known side of his career his work as a teacher of candidates for baptism In the revised edition of this seminal book both the text and notes have been revised to better reflect the state of contemporary scholarship on Augustine liturgical studies and the catechumenate both ancient and modern This edition also includes new findings from some of the recently discovered sermons of Augustine and incorporates new perspectives from recent research on early Christian biblical interpretation debates on the Trinity the evolution of the liturgy and much more This reconstruction of Augustine s catechumenate provides fresh perspectives on the day to day life of the early church and on the vibrancy and eloquence of Augustine the preacher and teacher

to Books in Print, 1997 Asian Traditions of Meditation Halvor Eifring, 2018-01-31 Meditation has flourished in different parts of the world ever since the foundations of the great civilizations were laid. It played a vital role in the formation of Asian cultures that trace much of their heritage to ancient India and China. This volume brings together for the first time studies of the major traditions of Asian meditation as well as material on scientific approaches to meditation. It delves deeply into the individual traditions while viewing each of them from a global perspective, examining both historical and generic connections between meditative practices from numerous historical periods and different parts of the Eurasian continent. It seeks to identify the cultural and historical peculiarities of Asian schools of meditation while recognizing basic features of meditative practice across cultures, thereby taking the first step toward a framework for the comparative study of meditation. The book, accessibly written by scholars from several fields, opens with chapters that discuss the definition and classification of meditation. These are followed by contributions on Yoga and Tantra, which are often subsumed under the broad label of Hinduism, Jainism, and Sikhism. Indian traditions not usually associated with meditation, Buddhist approaches found in Southeast Asia, Tibet, and China, and the indigenous Chinese traditions, Daoism and Neo-Confucianism. The final chapter explores recent scientific interest in meditation, which despite its Western orientation remains almost exclusively concerned with practices of Asian origin. Until a few years ago, a major obstacle to the study of specific meditation practices within the traditions explored here was a widespread scholarly orientation that prioritized doctrinal issues and sociocultural contexts over actual practice. The contributors seek to counter this bias and supplement concerns over doctrine and context with the historical study of meditative practice. *Asian Traditions of Meditation* will appeal broadly to readers interested in meditation, mindfulness, and spirituality, and those in the emerging field of contemplative education, as well as students and scholars of Asian and religious studies.

Emotions in Ancient and Medieval Philosophy Simo Knuuttila, 2004 The first part of the book covers the theories of the emotions of Plato and Aristotle and later ancient views from Stoicism to Neoplatonism. Ch 1 and their reception and transformation by early Christian thinkers from Clement and Origen to Gregory of Nyssa, Cassian, and Augustine. Ch 2 The basic ancient alternatives were the compositional theories of Plato and Aristotle and their followers and the Stoic judgement theory. These were associated with different conceptions of philosophical therapy. Ancient theories were employed in early Christian discussions of sin, Christian love, mystical union, and other forms of spiritual experience. The most influential theological themes were the monastic idea of supernaturally caused feelings and Augustine's analysis of the relations between the emotions and the will. The first part of Ch 3 deals with the twelfth-century reception of ancient themes through monastic theological, medical, and philosophical literature. The subject of the second part is the theory of emotions in Avicenna's faculty psychology, which to a great extent dominated the philosophical discussion of emotions in early thirteenth-century. This approach was combined with Aristotelian ideas in later thirteenth-century, particularly in Thomas Aquinas' extensive taxonomical theory. The increasing interest in psychological voluntarism led many Franciscan authors to abandon

the traditional view that emotions belong only to the lower psychosomatic level John Duns Scotus William Ockham and their followers argued that there are also emotions of the will Chapter 4 is about these new issues introduced in early fourteenth century discussions with some remarks on their influence on early modern thought *Books in Print* ,1994 The annotated Book of common prayer; an historical, ritual, and theological commentary on the devotional system of the Church of England, ed. by J.H. Blunt John Henry Blunt,1866 **The Annotated Book of Common Prayer ... Edited by the Rev. J. H. Blunt ... Sixth Edition** ,1872
