Supreme Court. Records and Briefs** California (State)., Court of Appeal Case s C004206 One Case - Two Systems: A Comparative View of American and German Criminal Justice Systems Floyd Feeney,Joachim Herrmann,2021-10-25 Using California as the model for the adversarial system and Germany as the model for the inquisitorial system this innovative work seeks to add a new dimension to the comparative study of criminal justice The basic idea is contained in the title One Case Two Systems

Containing the first ever side by side portrayals of full American and German trials the book views a single case through two separate lenses one American one German Returning home unexpectedly from a vacation in the country an elderly man interrupts a night time burglary in his own house and is attacked as the burglar tries to escape By portraying an ordinary crime a burglary that turns into a robbery rather than a dramatic high profile murder the book provides a detailed working picture of the two systems and the contrasts between them Allowing the reader to observe and compare the formal steps that cases go through in the two systems it brings the work of the police the prosecution the defense and the courts to life by giving thoughts and reasons as well as actions Even the most critical documents are included Designed to illustrate the most important differences between the two systems the country chapters first portray the California investigation and prosecution and then take the same case through the German system Often seeing eye to eye but sometimes diverging sharply the two sets of comments focus on the critical issues depicted in the country chapters seeking to explain the similarities differences and peculiarities of the two systems Published under the Transnational Publishers imprint Case and Comment ,1906 *Aviation Law: Cases, Laws and Related Sources* Paul B. Larsen,Joseph Sweeney,John Gillick,2012-06-07 The flying public airlines and governments will all agree on one date that changed commercial flying that was September 11 2001 The first edition of *Aviation Law Cases Laws and Related Sources* described early consequences of that event particularly compensation of victims and early tightening of aviation security Subsequently laws and regulations affecting all aspects of aviation changed so rapidly that it became difficult to set a cut off date for the second edition The rapid flow of events made an update urgent Several gaps in the materials of the first edition became evident as the book was used The authors filled those gaps pruned old materials and added much new material describing not only the later developments but also evolving economics and flight technology The objective of the case book is to offer a basic handbook for air law practitioners providing them with a starting point for almost any subject they may encounter For example a lawyer specializing in liability law will quickly be able to find basic materials on the International Civil Aviation Organization ICAO air carrier licensing FAA certification and labor law The book continues to present aviation law from the American point of view Thus the book will be valuable for foreign air lawyers who are guiding foreign airlines in service to the very important North American pool of air traffic The book also explains the international scene to American air lawyers so that they may guide their clients who provide foreign service New chapters on liability for cargo damage and for ground damages have been added and new materials on the legal rights of lessors successors actual carriers and code shares A chapter on environmental regulation of aviation noise and emissions is also new All the main subjects listed in the first edition are significantly updated The three authors are veteran transportation lawyers and continue their activities in this field
