- Describe the term sustainability as it applies to natural capital and sustainable societies
- Compare and contrast developing countries and developed countries with regards to population growth, wealth, resource use and pollution
- Determine the doubling time of any population given the rate of population growth
- Define the Tragedy of the Commons
- Cite the benefits of pollution prevention vs. pollution clean-up
- Identify the root causes of environmental problems
- Identify the principles of sustainability
- Calculate the ecological footprint of a country
- Describe the basic process of the scientific method; formulate and test a hypothesis
- Identify the main components of a system including inputs, throughputs and outputs and the role of feedback loops
- Describe synergistic interactions.
- Describe the types and structures of matter including atoms and ions, qualities of matter, states of matter and changes in matter
- Apply the Law of Conservation of Matter to the outputs of systems
- Compare and contrast the process of fission and fusion and apply the concept of half-life to radioactive decay
