Progress in Inflammation Research James A. Pitzer, 2005 The process of inflammation which causes the swelling and redness around a wound is a vital part of the body's system for fighting off infections When the body is hurt the immune system produces chemical signals telling cells to multiply without dying allowing skin to close over a gash for example Other chemicals spur the growth of new blood vessels to feed the recovering tissue Scientists have linked inflammation to cancer and recently to heart disease in several ways Doctors suspect that long term inflammation or infection is involved in up to 20 per cent of cancers including those of the oesophagus colon skin stomach liver bladder breast and some kinds of lymphoma C reactive protein CRP is one of the acute phase proteins that increase during systemic inflammation It's been suggested that testing CRP levels in the blood may be a new
