

Thermostat

The thermostat is of sleeve type and mounted in a housing made of press-cast aluminium, attached to the front of the front cylinder head.

The thermostat is closed until an opening temperature of 86 °C has been reached. Within an interval of 10 °C (86-96 °C), the thermostat moves from its closed position to fully open.

A shows circulation during warming-up of the engine when the thermostat is closed and coolant is led back to the pump.

B shows circulation when the engine is warm and coolant is led to the radiator.

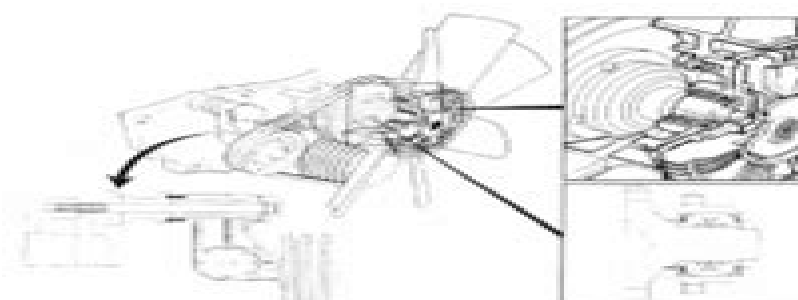

THERMOSTAT

Cooling fan

There are two types of cooling fan, a thermostatically controlled type and a fixed type, and are available in different variants, depending on the engine fitted in the truck. It is driven by double V-belts from the crankshaft pulley.

The belt tension is automatically adjusted by a spring-loaded lever. The fan bearing housing is bolted to the timing gear cover and the double ball bearing is lubricated continuously.
