Speech and Audio Processing for Coding, Enhancement and Recognition Tokunbo Ogunfunmi, Roberto Togneri, Madihally (Sim) Narasimha, 2014-10-14 This book describes the basic principles underlying the generation coding transmission and enhancement of speech and audio signals including advanced statistical and machine learning techniques for speech and speaker recognition with an overview of the key innovations in these areas Key research undertaken in speech coding speech enhancement speech recognition emotion recognition and speaker diarization are also presented along with recent advances

and new paradigms in these areas *Speech and Audio Signal Processing* Ben Gold, Nelson Morgan, Dan Ellis, 2011-08-23

When *Speech and Audio Signal Processing* published in 1999 it stood out from its competition in its breadth of coverage and its accessible intuition based style. This book was aimed at individual students and engineers excited about the broad span of audio processing and curious to understand the available techniques. Since then with the advent of the iPod in 2001 the field of digital audio and music has exploded leading to a much greater interest in the technical aspects of audio processing. This Second Edition will update and revise the original book to augment it with new material describing both the enabling technologies of digital music distribution most significantly the MP3 and a range of exciting new research areas in automatic music content processing such as automatic transcription music similarity etc that have emerged in the past five years driven by the digital music revolution. New chapter topics include Psychoacoustic Audio Coding describing MP3 and related audio coding schemes based on psychoacoustic masking of quantization noise Music Transcription including automatically deriving notes beats and chords from music signals Music Information Retrieval primarily focusing on audio based genre classification artist style identification and similarity estimation Audio Source Separation including multi microphone beamforming blind source separation and the perception inspired techniques usually referred to as Computational Auditory Scene Analysis CASA Digital Audio Signal Processing Udo Zölzer, 2022-02-24
