Beyond Cosmic Dice Moral Life In A Random World:

Beyond Cosmic Dice Jeff Schweitzer, Giuseppe Notarbartolo di Sciara, 2009 Beyond Cosmic Dice offers a new perspective on the purpose and meaning of life free from any divine influence By rejecting the false premises of religion people are free to pave their own roads for a better life God and the Folly of Faith Victor J. Stenger, 2012 Looking at both historical and contemporary contexts the author argues that religion has played a major role in suppressing scientific pursuit The God Debates John R. Shook, 2011-08-02 The God Debates presents a comprehensive non technical survey of the quest for knowledge of God allowing readers to participate in a debate about the existence of God and gain understanding and appreciation of religion s conceptual foundations Explains key arguments for and against God s existence in clear ways for readers at all levels Brings theological debates up to the present with current ideas from modernism postmodernism fideism evidentialism presuppositionalism and mysticism Updates criticism of theology by dealing with the latest terms of the God debates instead of outdated caricatures of religion Helps nonbelievers to learn important theological standpoints while noting their shortcomings Encourages believers and nonbelievers to enjoy informed dialogue with each other Concludes with an overview of religious and nonreligious worldviews and predictions about the future of faith and reason **The Code for Global Ethics** Rodrigue Tremblay, 2010-12 Humanists have long contended that morality is a strictly human concern and should be independent of religious creeds and dogma This principle was clearly articulated in the two Humanist Manifestos issued in the mid twentieth century and in Humanist Manifesto 2000 which appeared at the beginning of the twenty first century Now this code for global ethics further elaborates ten humanist principles designed for a world community that is growing ever closer together In the face of the obvious challenges to international stability from nuclear proliferation environmental degradation economic turmoil and reactionary and sometimes violent religious movements a code based on the natural dignity and inherent worth of all human beings is needed more than ever In separate chapters the author delves into the issues surrounding these ten humanist principles preserving individual dignity and equality respecting life and property tolerance sharing preventing domination of others eliminating superstition conserving the natural environment resolving differences cooperatively without resort to violence or war political and economic democracy and providing for universal education This forward looking optimistic and eminently reasonable discussion of humanist ideals makes an important contribution to laying the foundations for a just and peaceable global community *Nature That Makes Us Human* Michel Loreau, 2023 This book seeks to answer two fundamental questions Why do we keep destroying nature when science makes it clear that in doing so we risk our own destruction How can we stop doing so and regain the unity of humans and nature First the book shows that the inability of modern society to modify its relationship with nature has its roots in the collective fictions that have gradually shaped it since the Neolithic revolution The collective fictions that underpin modernity include in particular the subject object duality the matter mind duality the primacy of rationality and the superiority of the

human species over all other living beings These deeply ingrained fictions prevent us from acting in the world in agreement with the needs and knowledge that we have Second the book argues that humans have a nature that defines them as a unique species beyond their cultural differences and this nature is not made only of flesh and bones but also of a set of fundamental needs Fundamental needs connect humans with nature spontaneously because they are the manifestation of life in them They also make it possible to re establish the unity of body and mind and of the different forms of knowledge and to give the economy a new direction focused on the development of the human being and of its living environment Challenging our collective fictions and reconnecting with our deepest nature is essential if we are to overcome the current ecological crisis and allow life on Earth to flourish

The End of Christianity John W. Loftus, 2011-07-12 In this successor to his critically acclaimed anthology *The Christian Delusion Why Faith Fails* a former minister and now leading atheist spokesperson has assembled a stellar group of respected scholars to continue the critique of Christianity begun in the first volume Contributors include Victor Stenger Robert Price Hector Avalos Richard Carrier Keith Parsons David Eller and Taner Edis Loftus is also the author of the best selling *Why I Became an Atheist A Former Preacher Rejects Christianity* Taken together the Loftus trilogy poses formidable challenges to claims for the rationality of the Christian faith Anyone with an interest in the philosophy of religion will find this compilation to be intellectually stimulating and deeply thought provoking

Routledge Handbook of Ocean Resources and Management Hance D. Smith, Juan Luis Suárez de Vivero, Tundi S. Agardy, 2015-10-16 This comprehensive handbook provides a global overview of ocean resources and management by focusing on critical issues relating to human development and the marine environment their interrelationships as expressed through the uses of the sea as a resource and the regional expression of these themes The underlying approach is geographical with prominence given to the biosphere political arrangements and regional patterns all considered to be especially crucial to the human understanding required for the use and management of the world's oceans Part one addresses key themes in our knowledge of relationships between people and the sea on a global scale including economic and political issues and understanding and managing marine environments Part two provides a systematic review of the uses of the sea grouped into food ocean space materials and energy and the sea as an environmental resource Part three on the geography of the sea considers management strategies especially related to the state system and regional management developments in both core economic regions and the developing periphery Chapter 23 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license https://www.routledgehandbooks.com/doi/10.4324/9780203115398_ch23

Calorie Wars Larry Deutsch, Jeff Schweitzer, 2011-10-25 Increasingly disturbed by inaccurate and misleading information peddled by so called experts in the billion dollar weight loss industry Dr Larry Deutsch a family physician and Jeff Schweitzer a biologist and former White House senior analyst have decided to set the record straight This groundbreaking book presents the startling truth about

weight loss diets don't work To achieve significant long lasting weight loss we need to break with old ineffective ideas and embrace a completely new approach to weight loss As you read the book you will find yourself shocked to learn the truth about how easy losing weight can be **Advanced Philosophy and Ethics of Religion** Greg Dewar, 2002 Usual Revision Guide style with a topic graphically presented on each A4 page coverage of all AS A Level specifications for the subject

The Art of Life and Death Andrew Irving, 2017-09-15 The Art of Life and Death explores how the world appears to people who have an acute perspective on it those who are close to death Based on extensive ethnographic research Andrew Irving brings to life the lived experiences imaginative lifeworlds and existential concerns of persons confronting their own mortality and non being Encompassing twenty years of working alongside persons living with HIV AIDS in New York Irving documents the radical but often unspoken and unvoiced transformations in perception knowledge and understanding that people experience in the face of death By bringing an experience near ethnographic focus to the streams of inner dialogue imagination and aesthetic expression that are central to the experience of illness and everyday life this monograph offers a theoretical ethnographic and methodological contribution to the anthropology of time finitude and the human condition With relevance well beyond the disciplinary boundaries of anthropology this book ultimately highlights the challenge of capturing the inner experience of human suffering and hope that affect us all of the trauma of the threat of death and the surprise of continued life The art of life and death is unlike anything I have ever read in its combination of theoretical ambition and methodological innovation The book is the fruit of Irving's close collaboration with a remarkable group of men and women diagnosed with AIDS at a time when there was little hope of surviving the disease With the help of their words and crucially their art Irving illuminates the complex inner life world created by the trauma of threatened death and the surprise of continued life Inner experience and the challenge of capturing it lie at the heart of this book Danilyn Rutherford author of *Laughing at Leviathan* The art of life and death is a monumental anthropological achievement Fusing long term fieldwork deeply sensitive observation and a refined sense the phenomenology of our deep existential fears of illness of death and the emotional quandaries of having survived a confrontation with mortality Andrew Irving demonstrates how imaginative ethnography can reveal to us the deep contours of human being The art of life and death is filled with gripping narratives not only of pain confusion but also of courage and resilience It is a theoretically informed text that will long remain open to the world Paul Stoller author of *Yaya's story* The art of life and death is a brilliantly engaging piece of work that invites us to rethink life itself and introduces new ways of carrying out anthropological research Through a compelling interweaving of ethnography and theory Irving takes us close to lives that have been lived under conditions of existential uncertainty and recovery This book goes beyond conventional anthropology to offer a thoroughly inspiring account from which we learn not only about what it means to live near death but how art and the senses are implicated in life It will endure as an outstanding example of how to do anthropology at its best Sarah Pink coauthor of *Uncertainty and possibility* In this imaginatively conceived

book Andrew Irving asks compelling and daring questions on how to think of such categories as experience inner life or subjectivity in the face of imminent death He follows up with a very careful and caring ethnography of how art and life flow into each other Irving achieves perfect pitch in his writing A splendid achievement Veena Das author of Affliction Of the utmost importance a very worthwhile introduction to any medical anthropologist because it includes detailed ethnographic descriptions a variety of ethnographic methods and a range of key anthropological themes including a focus on embodied experiences social injustice and how individuals deal with death The narrative style of the book makes it easy to read and relate to This is a great feat given the complex and troubling themes discussed which lead one to question their very perception of life itself Journal of the Anthropological Society of Oxford Of interest to anyone looking to explore people s dynamic perceptive and reflective outlook on the world whether looking to the future contemplating death or simply being alive No curious anthropology student or for that matter person would be left un inspired or non transformed by this text and I implore as wide a readership as possible Anthropology Aging An exceptional achievement that gets under your skin from beginning to end Outstanding interweaving of theoretical critique and aspiration collaborative ethnography and methodological experimentation and innovation Inspiring essential reading for anyone interested in new ethnographic methods to more deeply access the complex inner dimensions of human experience American Ethnologist An excellent thought provoking book Brilliantly succeeding in drawing both a conceptual and empirical portrait of the patterns in which HIV as a socio historically traceable illness tends to articulate the life death dialectical relation on the discovery threshold of embodied mortality Groundbreaking Mortality This beautifully written and constructed book weaves together sophisticated social theory philosophy art work and vivid biographical narratives to offer insights into how HIV AIDS patients have learned to live a meaningful existence in the pre and post antiretroviral eras while negotiating a terminal illness Basing his book on 20 years of work with adults living with HIV AIDS in New York visual anthropologist Irving has carried out a compelling anthropological study of the complex inner world of those who struggle cope fight and ultimately come to terms with their own impending deaths The author draws on philosophical writings and social theories to contextualize his results but is at his best when allowing his subjects to speak for themselves The evocative words of subjects like artist Albert Velasco provide fascinating insights into the ways that dying persons with HIV AIDS grapple with the mundane like keeping medical appointments as well as the profound reckoning with their own mortality and purpose An engaging read that will enrich upper level and graduate collections on death and dying ethnographic methods and HIV AIDS Highly recommended Choice
