Bridging Research And Policy In Development Evidence And The Change Process

Thomas Waldman, Sultan Barakat

Bridging Research And Policy In Development Evidence And The Change Process:

The SAGE Handbook of Research Management Robert Dingwall, Mary Byrne McDonnell, 2015-08-17 The Handbook of Research Management is a unique tool for the newly promoted research leader. Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres, institutes and programmes. Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars. They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders. Although many scientific and technological disciplines have long been organized in this way, few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice. This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder. The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts. This book will be a standard work of reference for new research leaders in any discipline or country looking for help and inspiration. The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them.

Science and Technology Policy for Development Louk de la Rive Box, Rutger Engelhard, 2006-05-01 This book is about changing social relationships. The authors focus on the question of what social relations make for successful science and technology policies. In particular, the various chapters illustrate what happens at different social interfaces such as between policy makers and researchers and between the users and producers of knowledge. In other words, they are interested in the knowledge networks that are emerging between the many different actors involved in the development of science and technology.

Research Skills for Policy and Development Alan Thomas, Giles Mohan, 2007-05-16 This book is a critical guide to conducting investigations under time and resource pressured conditions, equipping readers with the key skills and approaches for research designed to influence or inform development policies. Unlike a simple how-to guide, *Research Skills for Policy and Development* also provides a critique of various methods and situates these approaches within real-life organisational settings, enabling those working in or studying development to locate, evaluate and use relevant information quickly but rigorously. The successor to *Finding Out Fast* (SAGE 1998), it reflects the changes in development management theories and practice over the last seven years and includes new material and advice on critical use of the web as a resource and research tool. It is essential reading for development managers in NGOs and public sector agencies as well as students of development management and development studies more generally.

Understanding Influence Thomas Waldman, Sultan Barakat, 2016-02-24 The overarching objective of this book is to analyse the manner in which statebuilding-oriented research has and can influence policies in fragile post-conflict

environments Large scale externally assisted statebuilding is a relatively new and distinct foreign policy domain having risen to the forefront of the international agenda as the negative consequences of state weakness have been repeatedly revealed in the form of entrenched poverty regional instability and serious threats to international security Despite the increasing volume of research on statebuilding the use and uptake of findings by those involved in policymaking remains largely under examined As such the main themes running through the book relate to issues of research influence use and uptake into policy It grapples with problems associated with decision making dynamics knowledge management and the policy process and draws on concepts and analytical models developed within the public policy and research utilisation literature This book will be of great interest to researchers knowledge managers and policymakers working in the fields of post war reconstruction statebuilding fragile states stabilisation conflict and development

Knowledge, Policy and Power in International Development Harry Jones, Nicola A. Jones, Louise Shaxson, David Walker, 2012-04-18 This book presents an academically rigorous yet practical guide to efforts to understand how knowledge policy and power interact to promote or prevent change It offers a power analysis perspective on the knowledge policy process illustrated with rich empirical examples from the field of international development combined with practical guidance on the implications of such an approach It provides ways to identify and address problems that have hampered previous attempts to improve the space between knowledge and policy such as difficulties in analysing political context persistent asymmetric relationships between actors ignorance of the contributions of different types of knowledge and misconceptions of the roles played by intermediary organisations Most importantly the book gives readers the ability to develop strategies for negotiating the complexity of the knowledge policy interface more effectively so as to contribute to policy dialogues influence policy change and implement policies and programmes more effectively The authors focus on the dynamics of the knowledge policy interface in international development offering novel theoretical insights and methodological approaches that are applicable to a broader array of policy arenas and their audiences including academics practitioners and students

Knowledge Actors and Transnational Governance D. Stone, 2013-08-29 Diane Stone addresses the network alliances or partnerships of international organisations with knowledge organisations and networks Moving beyond more common studies of industrial public private partnerships she addresses how and why international organisations and global policy actors need to incorporate ideas expertise and scientific opinion into their global programmes Rather than assuming that the encouragement for evidence informed policy in global and regional institutions of governance is an indisputable public good she queries the influence of expert actors in the growing number of part private or semi public policy networks

Clay's Handbook of Environmental Health Stephen Battersby, 2022-08-16 Since its first publication in 1933 Clay's Handbook of Environmental Health under its different names has provided a definitive guide for the environmental health practitioner EHP and an essential reference for the consultant and student This 22nd edition continues with its more recent successful

structure reviewing the core principles techniques competencies and skills required of an EHP and then outlining the specialist subjects without getting bogged down in a legalistic approach seeking to broaden the content for a more global audience This new edition seeks to educate the EHP on the public health impacts of global heating and the climate emergency and also reflects the COVID 19 pandemic as might be expected Although seeking to have global appeal the impact of the UK leaving the EU is also addressed The book examines environmental health in different settings including in the military working in both conflict and natural disaster settings and environmental health at sea and airports In line with previous editions case studies are used to illustrate how EH problems have been resolved This new edition includes guidance on key issues in public and environmental health including air pollution contaminated land housing and health noise water food safety pests and vector control chemicals in the environment and radiation as well as sustainability and public health and humanitarian crises This handbook aims to give a basic understanding of the philosophical basis of environmental health as well as the required technical aspects and an understanding of environmental health in different settings All chapters have sections on further reading and sources of information Clay s Handbook is essential reading for all practitioners students and researchers in environmental and public health wherever they are working

e-Governance for Development S.

Madon,2009-10-29 Over the past few decades there has been a rapid proliferation of eGovernance for Development projects Drawing on evidence from three longitudinal case studies of rural eGovernance projects this book shows that improving systems of governance is fundamentally a social rather than managerial or technological activity

Knowledge, Policy and Power in International Development Jones, Harry,Jones, Nicola A.,2012-04-18 This book presents an academically rigorous yet practical guide to efforts to understand how knowledge policy and power interact to promote or prevent change It offers a power analysis perspective on the knowledge policy process illustrated with rich empirical examples from the field of international development combined with practical guidance on the implications of such an approach It provides ways to identify and address problems that have hampered previous attempts to improve the space between knowledge and policy such as difficulties in analysing political context persistent asymmetric relationships between actors ignorance of the contributions of different types of knowledge and misconceptions of the roles played by intermediary organisations Most importantly the book gives readers the ability to develop strategies for negotiating the complexity of the knowledge policy interface more effectively so as to contribute to policy dialogues influence policy change and implement policies and programmes more effectively The authors focus on the dynamics of the knowledge policy interface in international development offering novel theoretical insights and methodological approaches that are applicable to a broader array of policy arenas and their audiences including academics practitioners and students

Knowledge to Policy

Fred Carden,2009-04-06 Does research influence public policy and decision making and if so how This book is the most recent to address this question investigating the effects of research in the field of international development It starts from a

sophisticated understanding about how research influences public policy and decision making It shows how research can contribute to better governance in at least three ways by encouraging open inquiry and debate by empowering people with the knowledge to hold governments accountable and by enlarging the array of policy options and solutions available to the policy process Knowledge to Policy Making the Most of Development Research examines the consequences of 23 research projects funded by Canada s International Development Research Centre IDRC Key findings and case studies from Asia Africa and Latin America are presented in a reader friendly journalistic style giving the reader a deeper grasp and understanding of approaches contexts relationships and events The book will be useful to academics researchers and students of political science public administration development studies and international affairs professionals in donor and development organizations worldwide policy and decision makers in government local and national levels and international arenas particularly trade and finance and development agencies and civil society non governmental organizations concerned with integrating the voice of citizens into policy and decision making processes
