Physical Arithmetic Alexander Macfarlane, 1885 **Tools of American Mathematics Teaching, 1800-2000** Peggy Aldrich Kidwell, Amy Ackerberg-Hastings, David Lindsay Roberts, 2008-08-11 From the blackboard to the graphing calculator the tools developed to teach mathematics in America have a rich history shaped by educational reform technological innovation and spirited entrepreneurship In *Tools of American Mathematics Teaching 1800 2000* Peggy Aldrich Kidwell Amy Ackerberg Hastings and David Lindsay Roberts present the first systematic historical study of the objects used in the American mathematics classroom They discuss broad tools of presentation and pedagogy not only blackboards and textbooks but early twentieth century standardized tests teaching machines and the overhead projector tools for calculation and tools for representation and measurement Engaging and accessible this volume tells the stories of how specific objects such as protractors geometric models slide rules electronic calculators and computers came to be used in classrooms and how some disappeared

Software Design for Flexibility Chris Hanson, Gerald Jay Sussman, 2021-03-09 Strategies for building large systems that can be easily adapted for new situations with only minor programming modifications Time pressures encourage programmers to write code that works well for a narrow purpose with no room to grow But the best systems are evolvable they can be adapted for new situations by adding code rather than changing the existing code The authors describe techniques they have found effective over their combined 100 plus years of programming experience that will help programmers avoid programming themselves into corners The authors explore ways to enhance flexibility by Organizing systems using combinators to compose mix and match parts ranging from small functions to whole arithmetics with standardized interfaces Augmenting data with independent annotation layers such as units of measurement or provenance Combining independent pieces of partial information using unification or propagation Separating control structure from problem domain with domain models rule systems and pattern matching propagation and dependency directed backtracking Extending the programming language using dynamically extensible evaluators
