Astronomy Calendar Multilingual Edition:

Multilingualism from Manuscript to 3D Matylda Włodarczyk, Jukka Tyrkkö, Elżbieta Adamczyk, 2023-01-24 This collection explores the links between multimodality and multilingualism charting the interplay between languages channels and forms of communication in multilingual written texts from historical manuscripts through to the new media of today and the non verbal associations they evoke The volume argues that features of written texts such as graphics layout boundary marking and typography are inseparable from verbal content Taken together the chapters adopt a systematic historical perspective to investigate this interplay over time and highlight the ways in which the two disciplines might further inform one another in the future as new technologies emerge The first half of the volume considers texts where semiotic resources are the sites of modes where multiple linguistic codes interact on the page and generate extralinguistic associations through visual features and spatial organisation The second half of the book looks at texts where this interface occurs not in the text but rather in the cultural practices involved in social materiality and text transmission Enhancing our understandings of multimodal resources in both historical and contemporary communication this book will be of interest to scholars in multimodality multilingualism historical communication discourse analysis and cultural studies Chapters 1 4 and 5 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com Chapters 1 4 have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license with Chapter 5 being made available under a Creative Commons Attribution 4 0 license Medieval Latin Christian Texts on the Jewish Calendar C. Philipp E. Nothaft, 2014-05-22 During the later Middle Ages twelfth to fifteenth centuries the study of chronology astronomy and scriptural exegesis among Christian scholars gave rise to Latin treatises that dealt specifically with the Jewish calendar and its adaptation to Christian purposes In *Medieval Latin Christian Texts on the Jewish Calendar* C Philipp E Nothaft offers the first assessment of this phenomenon in the form of critical editions English translations and in depth studies of five key texts which together shed fascinating new light on the avenues of intellectual exchange between medieval Jews and Christians *Persian Calendar* Kaia Stonebrook, AI, 2025-03-05 The book *Persian Calendar* explores the rich history and scientific accuracy of the Iranian or Persian calendar a solar based timekeeping system renowned for its precision This calendar deeply rooted in ancient Persia showcases a remarkable blend of astronomy history and cultural practices Developed through centuries of meticulous observation by Persian astronomers and mathematicians it stands as a testament to humanity's quest to measure time accurately Intriguingly the calendar's accuracy is so refined that it requires precise leap year adjustments determined by the vernal equinox The book traces the calendar's evolution from its ancient origins to its modern day usage in Iran and Afghanistan emphasizing its cultural significance in agriculture religious observances and national identity Chapters delve into the fundamental concepts of solar calendars the historical reformations and the mathematical underpinnings that ensure its accuracy By combining rigorous scientific analysis with historical and

Montgomery,Alok Kumar,2015-06-12 To understand modern science it is essential to recognize that many of the most fundamental scientific principles are drawn from the knowledge of ancient civilizations Taking a global yet comprehensive approach to this complex topic A History of Science in World Cultures uses a broad range of case studies and examples to demonstrate that the scientific thought and method of the present day is deeply rooted in a pluricultural past Covering ancient Egypt Mesopotamia India Greece China Islam and the New World this volume discusses the scope of scientific and technological achievements in each civilization and how the knowledge it developed came to impact the European Renaissance Themes covered include the influence these scientific cultures had upon one another the power of writing and its technologies visions of mathematical order in the universe and how it can be represented and what elements of the distant

scientific past we continue to depend upon today Topics often left unexamined in histories of science are treated in fascinating detail such as the chemistry of mummification and the Great Library in Alexandria in Egypt jewellery and urban planning of the Indus Valley hydraulic engineering and the compass in China the sustainable agriculture and dental surgery of the Mayas and algebra and optics in Islam This book shows that scientific thought has never been confined to any one era culture or geographic region Clearly presented and highly illustrated A History of Science in World Cultures is the perfect text for all students and others interested in the development of science throughout history **Scandalous Error** C. Philipp E. Nothaft, 2018-02-16 The Gregorian calendar reform of 1582 which provided the basis for the civil and Western ecclesiastical calendars still in use today has often been seen as a triumph of early modern scientific culture or an expression of papal ambition in the wake of the Counter Reformation Much less attention has been paid to reform's intellectual roots in the European Middle Ages when the reckoning of time by means of calendrical cycles was a topic of central importance to learned culture as impressively documented by the survival of relevant texts and tables in thousands of manuscripts copied before 1500 For centuries prior to the Gregorian reform astronomers mathematicians theologians and even Church councils had been debating the necessity of improving or emending the existing ecclesiastical calendar which throughout the Middle Ages kept losing touch with the astronomical phenomena at an alarming pace Scandalous Error is the first comprehensive study of the medieval literature devoted to the calendar problem and its cultural and scientific contexts It examines how the importance of ordering liturgical time by means of a calendar that comprised both solar and lunar components posed a technical astronomical problem to medieval society and details the often sophisticated ways in which computists and churchmen reacted to this challenge By drawing attention to the numerous connecting paths that existed between calendars and mathematical astronomy between the Fall of Rome and the end of the fifteenth century the volume offers substantial new insights on the place of exact science in medieval culture **Multilingual Cognition and Language Use** Luna Filipović, Martin Pütz, 2014-06-15 This volume provides a multifaceted view of certain key themes in multilingualism research today and offers future directions for this research area in the context of the multilingual development of individuals and societies The selection of studied languages is eclectic e g Amondawa Cantonese Bulgarian Dene Dutch Eipo Frisian German Mandarin Chinese Mori Russian Spanish and Yukatek among others they are typologically diverse and they are contrasted from a variety of perspectives such as cognitive development aging acquisition grammatical and lexical processing and memory This collection also illustrates novel insights into the linguistic relativity debate that multilingual studies can offer such as new and revealing perspectives on some well known topics e g colour categorisation or language transfer The critical and comprehensive discussions of theoretical and methodological considerations presented in this volume are fundamental for numerous current future empirical and interdisciplinary studies of linguistic diversity linguistic typology and multilingual processing
