National Library of Medicine Current Catalog National Library of Medicine (U.S.),1965 **Algemene farmacotherapie** W. Lammers,1975 *Ethics by Committee* Noortje Jacobs,2022-08-26 How liberal democracies in the late twentieth century have sought to resolve public concerns over charged issues in medicine and science Ethics boards have become obligatory passage points in today s medical science and we forget how novel they really are The use of humans in experiments is an age old practice that records show goes back to at least the third century BC and it has been popular as a practice since the early modern period Yet in most countries around the world hardly any formal checks and balances existed to govern the communal oversight of experiments involving human subjects until at least the 1960s Ethics by Committee traces the rise of ethics boards for human experimentation in the second half of the twentieth century Using the Netherlands as a case study historian Noortje Jacobs shows how the authority of physicians to make decisions about clinical research in this period gave way in most developed nations to formal mechanisms of communal decision making that served to regiment the behavior of individual researchers This historically unprecedented change in scientific governance came out of the growing international wariness of medical research in the decades after World War II and was meant to solidify a new way of reasoning together in liberal democracies about medicine and science But what reasoning together meant and who was invited to participate changed drastically over time In detailing this history Jacobs shows that research ethics committees were originally intended not only to make human experimentation more ethical but also to raise its epistemic quality and intensify the use of new clinical research methods By examining complex negotiations over the appropriate governance of human subjects research Ethics by Committee is an important contribution to our understanding of the randomized controlled trial and the history of research ethics and bioethics more generally **American Journal of Pharmacy and the Sciences Supporting Public Health** ,1965 Algemene farmacotherapie ,197? **Algemene farmacotherapie** Harm Wesseling,1999 **Nieuwe boeken en varia** ,1963 Parasitologic Research ,1982 **Behandelingsstrategieen bij angststoornissen** HSK/BU Cure & Care Development,2001-02-23 Deze tweede geheel herziene editie van Behandelingsstrategie n bij angststoornissen heeft tot doel recente resultaten van therapie effectonderzoek te vertalen naar de klinische praktijk Het is bestemd voor psychiaters en psychologen in opleiding en anderen in de geestelijke gezondheidszorg die met de diagnostiek en behandeling van angststoornissen of de indicatiestelling voor behandeling te maken hebben Van gedragstherapie cognitieve therapie en farmacotherapie is in diverse gecontroleerde studies de effectiviteit aangetoond Naar onze mening worden pati nten met angststoornissen tekort gedaan wanneer zij niet met deze therapievormen behandeld worden Het ligt daarom voor de hand dat gedragstherapie cognitieve therapie farmacotherapie en combinatiebehandelingen het leeuwendeel vormen van het therapeutisch arsenaal dat in dit boek wordt besproken Protocolonderzoek is tot op heden vrijwel niet verricht ten aanzien

van angststoornissen Het is dus niet mogelijk op basis van onderzoek te bepalen hoe non responders op een bepaalde ingestelde behandeling zo goed mogelijk kunnen worden doorbehandeld In deze gevallen zijn onze adviezen niet op onderzoek gebaseerd maar op klinische consensus Dit geldt ook voor de beslismomen in dit boek zij moeten niet gezien worden als dwingende voorschriften maar als hulpmiddelen om de besluitvorming te structureren en relevante overwegingen systematisch aan bod te laten komen
